GREAT FUTURE SEEN FOR INDUSTRY HERE

Belle Haven Head Tells of Plans For Securing Manufacturing Plants For Redwood City

One of the brightest futures facing any town in the state is ahead of Redwood City, according to Philip Aubyn, secretary of the Belle Haven Corporation in an address before the Redwood City Chamber of Commerce Monday. The Belle Haven Corporation owns more than 1500 acres of industrial land east of Redwood City including the old Sweeny ranch.

This land is now being prepared for one of the finest industrial developments in the state The site was selected after the corporation had investigated all available sites from Washington state to Mexico.

Aubyn stated that arrangements had already been made for locating one of the largest lumber mills on the Coast on this tract, also a large furniture factory. A pulp and paper mill is also contemplating locating on the tract as well as an automobile plant. If all these plants are secured, and Aubyn seeemed confident that they would be, it will mean a pay roll of almost $10,000 added to the present population's earnings.

Aubyn spoke strongly in favor of the proposed $45,000 bond issue for the purchase of 30 acres of land for a municipal water front. This land in a few years, he said will be worth at least $10,000 an acre. In the event that the bonds carry, Aubyn stated, his company will be glad to loan its big dredger to the city for the purpose of filling in the land and dredging the channel wider.

City Councilman D. R. Stafford, who actd as chairman, and E. B. Hinman, secretary-manager of the Chamber of Commerce, also spoke in favor of the proposed harbor bonds. The bond issue appears to have met with almost unanimous support in town, as no opposition has been made as yet to the proposal which will be voted upon by the people on April 9th.

The Chamber of Commerce has also endorsed the proposed new charter for this city, and the next meeting of the Chamber of Commerce will be devoted to a consideration of this proposed improvement in the city government.

The members of the Chamber of Commerce received enthusiastically Miss Eunice Schmidt, journalism teacher at the high school, who returned last week from New York, where she and Stanley Netherton Jr., the manager of the Sequoia Times had been representing that paper in a national contest of school publications. The paper received a number of first place awards. The presence of the representatives at this contest and the excellent showing made by the paper resulted in much good advertising to Redwood City.

COLLAPSE OF BRIDGE INJURES 3

Grayline Bus Falls Through Wooden Structure

The collapse of the bridge connecting the Portola road back of Menlo Park with Stanford and Palo Alto late yesterday afternoon endangered the lives of a score of passengers on one of the large Grayline sight-seeing buses which plunged through it.

The bridge was a wooden structure and in a very bad state of repair. The bridge has been the course of considerable controversy between this and Santa Clara county for many years, as the location of the road has long been disputed and neither county would expend funds on the bridge. The controversy has been settled within the past few months, and the two counties had decided to let a contract for a new concrete bridge.

Yesterday the bus returning from La Honda turned onto the bridge on its way to Stanford. As soon as it struck the planking of the bridge, the front end of the machine crashed through. The car was prevented from turning over by the fact that the rear wheels were still on the road.

Three of the passengers were slightly injured, but no serious injuries were received. The injured were removed to the hospital for treatment.

REALTORS TO MEET HERE ON APRIL 3RD

First Association Office To Be Established In An Airplane

Harry H. Culver, of Culver City and Los Angeles, president of the National Association of Real Estate Boards, (right) in the cabin of his Stinson-Detroiter, which will be his office during the year of his presidency. Lieutenant James B. Dickson, pilot (left).

The realtors of the district from Burlingame to Palo Alto will meet on April 3 at the club house of the Emerald Lake Club. The meeting is to be an important one for the real estate business of this district, and will be presided over by Harry H. Culver president of the National Assocation of Real Estate Boards.

Harry H. Culver, of Culver City and Los Angeles, California, president of the National Association of Real Estate Boards for the year 1929, was born in Milford, Nebraska. He worked his way while a student at the University of Nebraska. When the Spanish-American War was declared he left the university and enlisted. After the war he went to the Philippine Islands, where for a year he was a reporter on the Manila Times and later a special agent of the United States Treasury Department, work which he was egaged in for four years.

His work for the Treasury Department eventually took him back to the United States.

He entered the real estate business in Omaha in 1908. In 1910 he came to California to recuperate after an illness and remained to engage in the real estate business here.

McDonald Will Declared Void By Judge Buck

Judge Holds Will As Result of Influence

Judge Buck on Wednesday rendered a judgment nullifying a will of John McDonald, who perished in a fire which destroyed his cabin in the Butano on September 6th of last year. The will was filed by John Montgomery, attorney for Henry Hebring friend of McDonald to whom the bulk of an estate valued at about $30 000 was left. The will was contested by Miss Elizabeth Montgomery, of New Brunswick, sister of the deceased.

Montgomery, who was 76 year of age, died when his cabin burned.

An inquest was held by Coroner J. C. McGovern. One of the chief witnesses at the inquest was Henry Hebring, friend of the aged rancher and possibly the last one to see him alive. Hebring testified that on Tuesday evening he was talking to McDonald. He stated that he left the cabin and walked a short distance along the road. Looking back he noticed the smoke from the cabin and saw the flames through the window. When he reached the cabin he found it impossible to enter because of the flames. He called to his friend but received no answer. He then ran for help.

In his decision breaking the will of McDonald Judge Buck states, "This is not the will of John McDonald, but of James Montgomery. Judgment is for the contestant on both counts, undue nfluence and unsoundness of mind."

J. J. CALLAHAN DIES AFTER LONG ILLNESS

Was Long Associated with Politics of This County and Its Early Development

Late Wednesday evening James Joseph Callahan, a pioneer of this county, answered the final summons at Mills Memorial Hospital to which institution he was removed a few days ago. The passing of Callahan removes from this vale of tears a prominent pioneer who in times past was identified with the political history of the county. Back n the early eighties Callahan was the confidential friend and employe of the late Dick Cunningham, at that period the political leader of the peninsula. He conducted a hotel and saloon at San Bruno, when the town consisted chiefly of a railroad station and Cunningham's carravnary. The place was the headquarters for hunters during the winter season when the marshes surrounding that locality were fairly alive with ducks. The hotel was also the meeting place for politicians. Cunningham, while a Democratic boss, dominated both parties and in his palmy day was said to be the spokesman for the Spring Valley Water Company in matters political.

Cunningham was an astute politician, a ready debater and possessing a rare sense of humor. His reign was long and prosperous in the county. He died many years ago leaving a large estate in the northern portion of the county.

Callahan grew up under his tutelage, acquiring a good knowledge of politics. No man of recent years knew more about the early political history of the county than Callahan. He could, in his reminiscent moods, tell many tales of the political genius of Cunningham in manipulating county conventions of both dominant partes. His death removes a historian of those times. Callahan had the confidence of his employer and knew his secrets but there are many things that were never disclosed by the deceased.

After the death of Cunninghan Callahan leased the Millbrae hotel and conducted that place with success for a number of years. He retired from business about 25 years ago, the most of which was spent in Redwood City.

Callahan had been a resident of the county for nearly 50 years during which period he had made many friends, grappling then with hooks of steel to his heart. He loved his friends. To be with them was his greatest pleasure.

As a boy he suffered injuries that impaired his physique, but the handicap did not discourage him. He was jovial and good natured always. He knew taht life was only a parcel of moments tha finally he would reach the promised land where his physical handicap would be no more and that he would enjoy the blessings of a good l fioahrente i ings of a good life on earth.

Callahan was a devoted Christian, a good citizen and a man of robust honesty and strict integrity. Those who were ntimate with him know his excellent qualities of heart and mind.

The deceased was born in St. John, Canada, 73 years ago. The greater portion of his long life was spent in his beloved California.

He is survived by two nephews, W. E. Murphy of Saugus, near Los Angeles, and J. P. Murphy residing in Canada and a sister, Nellie Callahan, San Francisco.

The funeral will take place tomorrow morning from Mount Carmel Church at 9:30 o'clock. Interment, Holy Cross Cemetery, Colma.

J. V. Swift yesterday filed the last will of the deceased. It is dated August 13, 1926. By its terms two nephews Parnell Murphy and E. W. Murphy are left $5000 each. Mrs. Tom Costello, a cousin residing in Massachusetts, $500; Margaret and Alice Kerr, San Francisco, $100 each. The residue of the estate is bequeathed to a sister, Nellie H. Callahan, of San Francisco. The value of the estate is placed at $26,000. Miss Callahan is namcd executrix to serve without bonds.

"GHOST HUNTERS" FREED FROM JAIL

Five college boys arrested by Constable Grill while in the act of chasing ghosts in the old Hopkins residence in Menlo Park were released Wednesday followng a meeting with Edward Hopkins, owner of the property in the office of District Attorney Swart.

The boys arrested were Edwin B. DeGroot, William Markes James McNamara, Paul Burkes and Harry Eichelberger. The arrest followed a report to Constable Grill by a caretaker at the Hopkins estate that a carload of me had driven onto the estate and had entered the house. Constable Grill found the Stanford students in the basement lighting their way around with matches. They explained that they heard that the house was haunted and were looking for spirits in the basement. They were booked on a charge of attempted burglary, but released when Hopkins declined to press charges.

SACRAMENTO, Mar. 14—(CNB)—Believing that a bird in the bag is worth more than two in the bush, California nimrods apparently are acquiescent today on the proposition of cutting the "duck limit."

The Swing bill cutting the limit on ducks from 25 to 15 per day, and 50 to 30 per week, with shooting only on Wednesday, Saturday and Sundays already passed by the Senate, comes up for consideration in the Assembly this week.

Funeral Services Held Wednesday For Merchant

Funeral services were held Wednesday afternoon for Ole Johnson well-known retired butcher of this city. Services were held at his late home on Duane street under the auspices of San Mateo Lodge B. P. O. E. Rev. C. H. Stevens, formerly pastor of the Congregational Church here, conducted the services. Interment took place in the family plot in Cypress Lawn Cemetery.

Johnson has for many years been a resident of this district having lived here and at Woodside. He for many years conducted a meat market at Woodside and was for some years in business here in partnership with the late J. F. Johnston in the firm of Johnson & Johnston at the Central market. He was a native of Sweden, 58 years of age, and had spent more than 30 years in this country.

He is survived by his wife, Mrs. Charlotte Johnson and by the following children: Mrs. C. A. Immel, of Mill Valley; Mrs. Bavard Laland, of Berkeley; and Lois, Milton and James Johnson of this city.

North Sacramento—New hardware store opened on Rio Linda avenue.

Dunsmuir—Improvement of golf club under consideration.

North Sacramento—Super-service station opened for business here recently.

Six Added to Traffic Squad

Provisions Made For Night Patrol On Highways

The traffic squad of San Mateo will be increased by seven new members by action taken Monday by the San Mateo County Board of Supervisors. This will bring the strength of the traffic department to 16 members including two office deputies. The increase in number of officers will take care of a night patrol on all important roads of the county.

Seven names were selected from applications received by the supervisors for appointment to this department. Those chosen were:

William Francs of 318 Mt. Diablo avenue, San Mateo; E. Maillard, 221 North Claremont street, San Mateo; Otto Schramm, 46 Betta street, Daly City; E. O. Truleson, 430 Bellevue avenue, San Mateo; J. W. Roukner, West Popular avenue, San Mateo; C. E. Gibson, of San Mateo; Mrs. Mona Christensen of East Palo Alto.

Mrs. Christensen will act as a deputy to assist Mrs. Hilda McGovern, the present deputy in the traffic office in Redwood City.

The present state traffic officers operating in the county, not counting Mrs. McGovern, who remains in the office, are as follows: Captain James B. Logan Lee Bond, Douglas Goulsen, James B. Dalziel, Jack Quninlan, J. C. Wallace, William Riley and Chester Kreiss.

NEW DEPUTY NAMED BY COUNTY SHERIFF

T. F. Rouck, well-known resident of Daly City and for several terms councilman of that city, is now a deputy sheriff. Rouck was appointed this week by Sheriff J. J. McGrath to succeed James T. O'Hanlon, who resigned as deputy some time ago. Rouck resigns his position on the city council of Daly City to accept the new appointment. He has had experience both in police duty and in handling the civil duties incumbent on the sheriff's office.

LIONS CLUB TOLD OF CHARTER PLAN

One of the most enjoyable programs ever offered here was enjoyed Wednesday by members of the Redwod City Kiwanis Club by Harry Carr, vice-president of the Bank of Italy in San Francisco, and former presdent of the California Bankers' Association. Carr's talk was on business methods, and was so interspersed with humor that the clubmen were kept laughing from start to finish. The chairman of the meeting was Z. T. Thorning, who also added to the merriment of the meeting.

Riverside—$25,000 expended for mprovements at Riverside county courthouse.

Grocery Chain Started Here For Peninsula

A. Larsen, who is this week opening a market at 244 Main street, is establishing a chain of cash stores all along the peninsula from San Jose to Burlingame. The L. System, as he has named it, will carry a full line of quality groceries.

Exchangites Hear Of Liquifying Air

Hot air, which so often forms the topic of afterndinner speeches, was changed to cold air at the Exchange Club this week when F. D. Loughlan and H. L. Hood of the Air Reduction Sales Company, of Emeryville, spoke on liquid air. The talk was highly interesting and instructive, as were also a number of experiments shown by the men with the products which they sell. The chairman of the meeting was Harry Hallett.

Dr. Harry Mason was welcomed as a member of the club by A. J. Stebenne.

Mr. and Mrs. W. A. Crowell enjoyed a visit this week from the former's daughter, Mrs. Elaine De Young of Sacramento.

Sacramento—$750,000 appropriated for creation of state prison for women.

Building permits issued in San Francisco during February totaled $2,314,112.

WOODSIDE

Mr. and Mrs. Daniel C. Jackling left for New York on Friday last en route to Europe where they will receive delivery of the yacht that has been under construction for them for the past two years. This yacht has been built at one of the leading German ship yards and represents the latest and most advanced engineering design and construction furnishings makes the yacht the which combined with the interior finest of its size ever constructed. The Jacklings' tour will take between one and two years as they purpose to travel lesurely.

Mrs. Virginia Miller left yesterday to join her husband in Portland. She has been spending the winter with relatives in Woodside.

Mr. adn Mrs. Herbert Gallagher and family will spend Easter Week vacation at their home here.

The many friends and old-time neighbors of Ole Johnson, at Woodside, were grieved to hear of his death in Redwood City last week. He was almost an institution in Woodside twenty years ago when it was even more rural than it is now.

There are many reminders of spring in the air these days, but none so insistant as the sight and fragrance of the lilac trees. The peculiar, vivid green of the leaves, the purple and white blossoms and the pervading odor carries me back to my boyhood and the East where a certain hedgerow of lilacs came into leaf and bloom before the last snow had disappeared from the shady corners of the garden.

POINTED PARAGRAPHS

Shopping in Redwood City Helps Lighten the Weekly Budget

By the Shopper

Have you eved stopped to figure out the actual savings the food stores are offering each week? It is interesting to keep a memorandum for the month. The specials alone, compared with the regular prices, may make possible the new Easter hat.

Have you seen the clever porch and street dresses that are really new? Something different in cunning ensembles and high ties. And prices so very reasonable. Some are advertised in this issue and more are being unpacked every day. Be sure and see them before you buy.

Girls, we have a new millinery shop in town. Have you seen their display of really captivating Easter styles? Don't miss them.

Have you seen the new Frederics Vita Tonic permanent wave? It's adapted to all textures of hair, and I'm sure you'll be delighted with the soft natural wave it gives you.

Did you ladies know you can get real comfort from the new Arch Lever, arch supporting shoe? Redwood merchants are also featuring solid comfort work shoes for men at very reasonable prices this week.

Now is the time for gardens. Did you notice the special prices on all kinds of garden implements offered this week? Gardening becomes even more of a pleasure with proper tools.

One of the Redwood merchants is featuring Edison radios this week. Had you noticed? This radio has been called a "voice from the skies." Perhaps a demonstration will show you why?

Contract Let For Work on Main Streets

Resurfacing of Streets Won by Local Builder

Contracts for the improvement of Broadway and Main street were let Monday evening by the city council. The improvement is to consist of widening both streets by removing three feet from the sidewalk on each side, on Broadway from the railroad track to Main street, and on the latter from Broadway to Maple street. Both streets will be resurfaced and the present 33 electroliers will be replaced by 59 new and larger electroliers.

The contract was let to the Peninsula Pavng Company by the council on a bid of $54,889.61. This was the lowest of five bids submitted. Work on this improvement is to be started immediately and it is expected that the work will be completed during the next 90 days.

A resolution was also passed by the council calling for the improvement of streets and around Lexington square by paving and the erection of concrete curbs and gutters.

KIWANIANS ENJOY BANKER'S ADDRESS

The Redwood City Club of Lions was addressed Tuesday evening by C. M. Doxsee, one of the board of 15 freeholders elected by the people of Redwood City to draft a new charter for this city. He addressed the local service club on the provisions of the proposed charter, which will be voted upon by the people on April 9. The chairman of the meeting was Dr. Francis Gruss.

CALIFORNIA NEWS BRIEFS

Travel to the Sequoia Ntaional Park shows a 20 per cent increase over last season to date. More than 18,000 visitors have entered the national playground.

Santa Cruz monkeys are enjoying all the comforts of home. As a result of complaints of the Humane Socity, the city ordered that monkeys in the municipal park be removed from damp cages into warmer quarters.

Reminiscence of pioneer days were passed at Watsonville as Mrs. John T. Porter celebrated her ninety-first birthday. Mrs. Porter is the mother of the late Lieutenant Governor Warren R. Porter of California.

H. W. de Witt, rancher, residing southwest of Red Bluff, suffered a heavy loss when his barn, valued at $1000, and several tons of hay were destroyed by a fire of undetermined origin.

Proposals made by Richmond building contractors that the city require all general contractors to pay a license fee of $100 a year and be placed under $5000 bond were being studied by the city council.

California hopes to interest the federal government in establishment of a governmental narcotic hospital in this state, it was explained, with passage by the Assembly of a resolution by Z. S. Leymel of Fresno authorizing creation of a state legislative committee to study narcotic conditions.

The Trades and Labor Council of Bremerton and vicinity has pledged itself to endeavor to secure the construction of four of the fifteen cruisers recently authorized by Congress in the Pacific Coast navy yards. While not definitely stated, it is believed the plan would contemplate awarding of two ships each to Mare Island and Bremerton.

Reports that Dr. David P. Barrows, former president of the University of California and now head of the political science department at the school, was considering an appointment to the post of governor general of the Philippine Islands were denied by him. Dr. Barrows has on several previous occasions been mentioned for the post.

Boy students at Porterville Union High school have yielded to blandishments of spring and a long cherished love of color, or a desire to surround themselves with their most favorable aura, and broken out with an epidemic of sox. Their trousers are tucked into sox of all kinds—except plain. A riot of color flows through the gloomy corridors, over the campus, even to the business district.

A. L. Woolridge is recovering at his home in Hollywood after being stranded in Death Valley for thirty hours without food, after his automobile broke down. He was rescued by A. S. Howie, Los Angeles automobile man, and taken home. When discovered Howie said Woolridge was in a semidelirious condition, wandering about the desert off the road. He had drunk all the water from the radiator of his automobile.

Immediate action in advancing the State water plan was asked of the San Joaquin Valley Regional Advisory Board of the California Development Association at Fresno by Tulare and Kern interests. The council authorized creation of a committee to take up the desired action with its parent body, and if desired, present the plight of Southern San Joaquin Valley water users to the Legislature urging immediate action.

Governor Young and his advisers are giving serious consideration to the proposed shakeup in the State Corporation Commissioner's office, and widespread changes in the personnel of the San Francisco and Los Angeles branches are predicted at the Capitol. The resignation of Commissioner J. M. Friedlander of Los Angeles is expected to be in the hands of the Governor soon, and action upon it will probably be taken by the end of March.

The Solano Supervisors have gone on record as favoring the plan of the California-Hawaiian Sugar Refining Company at Crockett to install pipe lines from the Suscol wells in Napa County to the Carquinez bridge, Vallejo. The Supervisors have passed a resolution tentatively granting requested rights-of-way, with the understanding that they would have the right to reject the permits should it develop that the City of Vallejo objected to the plan.

With A. R. Heron, State Director of Finance, and Vierling Kersey, State Superintendent of Public Instruction, making addresses, the corner stone for the new $230,000 Chico State Teachers' College was laid at an impressive ceremony. A crowd estimated at 2000 witnessed the event. The speakers were introduced by W. M. Wellenberg of San Francisco, deputy grand master of the grand lodge of Masons, who, assisted by several other officers of the grand lodge, sealed a copper box within the corner stone.

Fire insurance rates in Woodland have been cut 10 per cent in the business district and the slash is greater in the residence section. The cut follows an inspection several weeks ago by representatives of the fire underwriters.

Company A, Turlock National Guard unit, made 100 per cent qualifications in both rifle and pistol competition during 1928, placing it at the head of the list of California companies. This was announced by Captain L. L. McGee, commanding officer, after receipt of word from the adjutant general's office in Sacramento.

Ernest J. Kump, architect, has been named chairman of the Civil Service Commission of Fresno city succeeding Arthur W. Bernhauer, who was forced to resign his office when he moved his home outside the city limits.

The State Railroad Commission will conduct a hearing in Fresno the latter part of March on the application of the Southern Pacific to secure permission to cross White's Bridge road for its new Biola-Kerman branch line. The Board of Supervisors is to demand separation of grades before allowing the railroad permission to cross the county highway.

Decision was reached at a meeting of the Woodland Ministerial Association to hold community Easter sunrise services in Woodland.

A fifth unit is soon to be added to the Pittsburg plant of the Johns-Manville Corporation, to be devoted to the making of textiles, it was disclosed recently with the purchase by the organization of the Weaver-Henry Manufacturing Company of Los Angeles.

A three-story brick addition to the Travelers' Hotel in Martinez, to cost approximately $30,000, is soon to be erected. The first floor is to be devoted to three stores fronting on Main street, and the top floors will have fourteen two-room hotel apartments.

Contract for the grading and paving of 2.2 miles of highway through Pinole and Hercules, in Contra Costa county, to Prentiss Paving Company of San Jose has been awarded on a bid of $159,905.05.

Residents of Arroyo Grande will ballot on the proposal that the city issue bonds in the sum of $60,000 for the purchase of the water system now owned by the Midland Counties Public Service Corporation.

Pacific Coast Transit Company has been authorized by the Railroad Commission to purchase from H. Harper an auto stage line operating between Santa Maria and Guadalupe, Santa Barbara county, and to issue $2,700 capital stock in payment therefor.

The town council of the artist colony settlement was on record favoring a plan to rename all streets in Laguna Beach after artists. A committee was appointed by the council to make the new designations.

The Redwood Empire Association has invited editors of metropolitan papers to see the wonders of northern California. Leaving San Francisco about June 10, the party will go north by train and motor, visiting all the historic and scenic spots en route. The tour will take seven days.

Industrial committee members of the Richmond Chamber of Commerce have been instructed by the board of directors to find a suitable site in the city to be used as a possible army air base and submit their findings to the army engineers, who have been empowered to select such a site for the $5,000,000 base to be established on the west Coast.

Directors of the Red Bluff Round-up Association at a recent meeting voted to double the amount of the prize money to be offered contestants in the annual rodeo to be held late in April. Heretofore the prize money has amounted to about $1500 and this has been increased to $3000, most of the additional money being offered in the bronc riding and racing events.

Louis T. Samuels announces the sale for the Bank of Italy of the two-story gray stone building on the corner of Main street and Gabilian avenue in Salinas. The buyer was Councilman Manuel Gilkbarg of Salinas. The entire building of stores and offices is all leased. The purchase price was $150,000, all cash.

Wallace H. Hubbert of San Francisco has completed the plans and awarded a contract for the erection of a three-story Spanish style hotel, to be erected in Visalia for F. H. Dunne. The building will cover a site 132 feet square, and will contain spacious lobby, coffee shop, stage depot and stores. All rooms will be equipped with every modern hotel convenience.

Formation of a port district, comprising San Francisco and San Mateo counties, to take over the control and management of San Francisco harbor and other bay territory from the State was discussed by Congressman Richard J. Welch of the Fifth District and members of the San Francisco legislative delegation. Possibility of attempting to have port district legislation passed if the harbor transfer bill, already approved by the Assembly, should fail in the Senate, was considered by Welch and his conferees.

National Business Women's week will be observed in all parts of the United States by 55,000 business and professional women. In San Francisco elaborate preparations for the celebration, which is under the auspices of the National Federation of Business and Professional Women's Clubs, is being made by the local League of Business and Professional women. The purpose of the week is to demonstrate to the Nation that though self-improvement is the principal object of the business women's clubs they also strive to improve the educational, vocational and ethical standards of the country.

The text of arguments prepared by P. H. Griffin, Turlock Irrigation District attorney, to be used by the Irrigation Districts' Association of California against two proposed constitutional amendments that would affect irrigation districts were revealed at Modesto. The amendments are No. 2 and No. 13. Amendment 2 proposes that irrigation districts be classed under the same general laws as privately owned public utility corporations for the taxation purposes. The other amendment would give to counties the right to assess lands owned by irrigation districts outside of the county in which the irrigation system is located.

Solano county has been directed to communicate with the department of public works, division of highways, and request that a survey be made for a new highway leaving a point near Vacaville and going north through Winters and Madison to the present highway on the north.

When Charles Curtis took the oath of Vice-President of the United States, a Bible 365 years old and an heirloom of a San Jose family was used in the ceremony. History of the Bible was revealed by Mrs. E. J. Kaffer of San Jose, in whose family it has been for five generations.

Derived from an Indian word, Fresno county's new tuberculosis sanatorium at Auberry will be known as Wish-I-Ah Tuberculosis Sanatorium. According to tradition, Indians mounted the knoll near what is now New Auberry and exclaimed Wish-I-Ah, translated to mean wonderful view or good luck.

Knights of Pythias from Redding, Chico and Willows met with local knights to prepare for the intersectional convention to be held at Red Bluff late in March when grand officers of the organization will visit that city.

New portrait of George Akerson, who has been closely associated with Herbert Hoover and now is the new President's secretary. He is a graduate of Harvard and was formerly a newspaper man.

LA GUARDIA WEDS

Representative Fiorello H. La Guardia of New York recently was married to his secretary, Marie Fisher. The photograph shows Mr. and Mrs. La Guardia shortly after the ceremonies.

Hard to Eradicate

It is hard to eradicate latent suggestions of witchcraft. When you sneeze, almost any friend is liable to say "Gesundheit!" to scare away the pneumonia germs or rap three times on wood in order "to frighten the devil."

But Both Must Be Met

A medical writer says that the last generation has learned to put off death an additional ten years, thus marking another distinction between death and taxes.—Paducah Evening Sun.

FARM POULTRY

DRIED MILK WILL HELP CURE CHICK

Part of Treatment for Flocks With Coccidiosis.

For chicks affected with coccidiosis, a diet rich in milk is one of the measures advocated for the cure and control of the disease, by the poultry husbandry department of the Ohio State university. Not that simply feeding lots of milk is a sure or complete control measure. It must be employed as one of the features of a general treatment of which sanitation and prevention are the outstanding practices.

In combating coccidiosis in a flock the poultry husbandry department recommends four steps, giving epsom salts at the rate of one pound to four gallons of water; confining the chicks to the brooder house or moving the house to clean sod so that there is no reinfestation from the soil; cleaning the brooder house thoroughly and disinfecting it every three days, and placing the chicks on a diet which is rich in milk.

Quick relief from a diet of liquid milk is not likely because the birds will not consume enough of it. In using dry milk, best results are obtained when the mash is composed of 40 parts of dry milk. No other source of animal protein should be used in the mash.

The following mixture has been found to give satisfactory results when fed as soon as the disease appears and kept before the chicks as long as it is in evidence: dry skim milk, 40 pounds; wheat bran, 10 pounds; yellow corn meal, 30 pounds; ground rolled oats or barley, 20 pounds.

Selection of Breeding Stock Helps Turkeys

One of the most important steps towards successful turkey production depends upon the proper selection of the breeding stock. Weak poults, small, scrubby turkeys and unhatchable eggs are often traced to carelessness in the selection of the breeding stock. Turkeys that are used as breeders must possess those physical characteristics, showing strength and vigor. These characteristics are manifested as a general rule by a deep and wide body, the back broad and the breast round and full. The head shows certain physical characteristics of strength, namely: the eyes should be active and alert, the head should be fairly short, broad and deep and of good size, showing a clean, healthy appearance. The legs of the birds should be well apart, showing a strong, sturdy shank and straight toes. Considerable emphasis should be given in the selection of the male bird. This in itself should improve the stock from year to year. Early hatched toms, as a general rule, are sufficiently matured to make good breeders the first season. One should avoid using the late hatched male birds for breeding purposes.

Oyster Shells Provide Right Source of Lime

Usually oyster shells provide a good source of lime for poultry. Quite often they are not broken up in sufficiently small parts. But they are cheap and when clean and not scattered in filth are safe. As a rule, they should be kept in clean self-feeders or places where they will not become contaminated. This will do most good when the birds are fed feeds containing vitamines, because lime is assimilated best in the presence of or when birds have the necessary vitamines to aid in digesting and assimilating it. If bone meal or healthy clean bones are crushed or ground and kept clean and wholesome, the good bone along with the vitamines will furnish lime and phosphate. But there are some things in the processes of digesting and assimilating lime that are not known. Yet we know poultry must have some form of lime in their feed. Lime and phosphate may be obtained from other animal tissues and from vegetables and grains.

Hatch Chicks Early

Much has been said for or against early hatching of chicks. It is a question that every breeder and producer will need to answer according to his own circumstances. In making the decision he should take into consideration not only the immediate convenience, but also the future usefulness of the birds. It is a fact that early hatched chicks are more profitable winter layers, the same as fall freshening dairy cows are the most profitable milkers.

Skim Milk for Hens

On many farms skim milk is used with stock that will not pay as great a return for its use as when fed to poultry. Most records indicate that it is worth more when fed to poultry than to any other class of live stock. In fact, more poultrymen are feeding different types of condensed milk, than all other classes of live stock. This indicates that poultry responds particularly well to milk feeding. The minerals in milk are also beneficial to the fowls.

Feed for Eggs

One can feed a flock of hens more economically than a flock of pullets because the hens need only a maintenance ration plus what is needed for eggs, while the pullets need maintenance—building material for feathers, bone and muscle—and egg material, too.

One can putter over a few hens and get fun from coaxing a good egg yield out of them by feed and care when too many hens are just a chore and perhaps a burden.

FRATERNAL DIRECTORY

MENLO PARLOR, No. 188, N. S. G. W., meets every Thursday evening of the month in Duff and Doyle Hall.

The Seasoning

Colonel Hotspot (finishing the discussion)—Yes, my boy—men about fifty are the salt of the earth!

His Son—Perhaps you're right, father—but it takes those under fifty to put in the pepper.

Quick Work

Fat Lady—So you really think a massage machine will reduce my waist. Where can I get one?

Doctor—I jes' saw a steam roller go down th' street.

ONLY ONE OF HIS KIND

Tom—"What's the dentist so chesty about?" Jim—"He says he's the only man in town who can tell a woman to shut her mouth and get away with it."

Thirst for Fame

"If you decide to marry, your pictures will be in all the papers."

"That's why I hesitate," said Miss Cayenne. "Appetite for publicity is hard to satisfy. I might not be able to break into the illustrations again without getting a divorce."—Washington Star.

One is allowed to talk about himself if he will ridicule himself a little.

HOSPITAL CONTRIBUTIONS

Jones—"That motorist is always contributing to the hospitals." Adams—"I thought he was pretty close with his money." Jones—"Yes; but more liberal with the people he hits and sends in."

Sold Tin Lizzies, Too

Professor of History—You say there's a question in ancient history that puzzles you. Speak up, young man; what is it?

Freshie—It's this, sir. Did a mail order house handle those mail suits the knights wore when they went to battle?

Nothing can bring you peace but the triumph of principles.—Emerson.

Heard at the Theater

Man Behind—Will you be good enough to remove your hat?

Woman in Front—This beautiful picture hat?

Man Behind—I didn't come here to see moving pictures.

Real Value at Last

"At last I have written something for the Love Story Magazine that has been accepted."

"What is it?"

"A check for a year's subscription."

Makes Life Sweeter

Children's stomachs sour, and need an anti-acid. Keep their systems sweet with Phillips Milk of Magnesia!

When tongue or breath tells of acid condition—correct it with a spoonful of Phillips. Most men and women have been comforted by this universal sweetener—more mothers should invoke its aid for their children. It is a pleasant thing to take, yet neutralizes more acid than the harsher things too often employed for the purpose. No household should be without it.

Phillips is the genuine, prescriptional product physicians endorse for general use; the name is important. "Milk of Magnesia" has been the U. S. registered trade mark of the Charles H. Phillips Chemical Co. and its predecessor Charles H. Phillips since 1875.

PHILLIPS Milk of Magnesia

"All the world's a stage," and to the barber are given many parts.

To Keep Food Sweet

Plan on a regular cleaning of your refrigerator with 20 Mule Team Borax. Borax is an ideal cleansing agent for this use because it is a deodorant and a mild, harmless antiseptic as well as a cleanser.—Adv.

The best way to get out of debt it to pay out.

What Will you do

When your Children Cry for It

There is hardly a household that hasn't heard of Castoria! At least five million homes are never without it. If there are children in your family, there's almost daily need of its comfort. And any night may find you very thankful there's a bottle in the house. Just a few drops, and that colic or constipation is relieved; or diarrhea checked. A vegetable product; a baby remedy meant for young folks. Castoria is about the only thing you have ever heard doctors advise giving to infants. Stronger medicines are dangerous to a tiny baby, however harmless they may be to grown-ups. Good old Castoria! Remember the name, and remember to buy it. It may spare you a sleepless, anxious night. It is always ready, always safe to use; in emergencies, or for everyday ailments. Any hour of the day or night that Baby becomes fretful, or restless. Castoria was never more popular with mothers than it is today. Every druggist has it.

Fletcher's CASTORIA

Love makes the world go round only when the lovers are intoxicated with happiness.

WHAT WILL IT DO?

Women are saying: "Pinkham's Compound keeps me fit to do my work." "I was nervous and all run down. Now I eat better and sleep better—". "It helped my thirteen year old daughter."—"I took it before and after my baby was born." —"I am gaining every day."

Lydia E. Pinkham's Vegetable Compound

Feel Good

Most ailments start from poor elimination (constipation or semi-constipation). Intestinal poisons sap vitality, undermine health and make life miserable. Tonight try NR—Nature's Remedy—all-vegetable corrective—not just an ordinary laxative. See how NR will aid in restoring your appetite and rid you of that heavy, loggy, pepless feeling. *Mild, safe, purely vegetable—*

NR TO-NIGHT TOMORROW ALRIGHT

At Druggists—only 25c

PISO'S for COUGHS

Quick Relief! A pleasant, effective syrup—35c and 60c sizes. And *externally*, use PISO'S Throat and Chest Salve, 35c.

A Tax Warning

PRESIDENT COOLIDGE points out in a recent statement that after eight years of applying business methods to the Federal Government, extravagances and useless expenditures have been eliminated, to the extent that three reductions have been made in tax rates and nearly $7,000,000,000 has been cut off the national debt.

"It would be a great mistake," he said, "to suppose that we can continue our national prosperity with the attendant blessings which it confers upon the people unless we continue to insist upon constructive economy in government. The margin between prosperity and depression is always very small. A decrease of less than 10 per cent in our national income would produce a deficit in the present budget.

"The costs of state and local governments are rapidly mounting. From $3,900,000,000 in 1921, the National Industries Conference Board estimates that they reached $7,931,000,000 in 1927. This is such a heavy drain on the earnings of the people that it is the greatest menace to the continuance of prosperity. It is a red flag warning us of the danger of depression and a repetition of the disaster which overtook the country in the days of 1920."

Trees

There is something restful and appealing in tree bowered streets—streets whose bordering greenery meets in a leafy arch overhead. One who has seen the tree-lined streets of Sacramento, of Marysville and other of the older towns in the valleys, where shade is essential, cannot fail to be impressed by their beauty. On such streets even the poorist house seems to partake of the beauty of its surroundings.

All too often street trees are sacrificed to progress and wider sidewalks. But we dare to be called old fashioned and to admire those business streets, now almost a thing of the past, where each business place was fronted by a row of trees, between whose trunks were benches and chairs for the comfort of the weary.

New Words to an Old Tune

Adequate faculties of sight, hearing, and thinking are fundamental qualities which one must possess to insure longevity in this age of automobiles, with its attendant risk to life and limb. There is one state of mind, suggests an article by the National Automobile Club, which has seldom, if ever, been played-up as a prerequisite to SAFETY FIRST and simple though it may sound, that necessary trait is a GOOD DISPOSITION.

How many times, upon the occasion of some narrow escape which we have contributed, rightfully or otherwise, to the negligence of the "other party," have we allowed our temper the privilege of a momentary flare-up only to participate in a series of near-accidents during the interval of time required for our temperature to return to normal Actual tests, carried on under the supervision of reputable doctors, have proven unconditionally that a man's ability to think varies inversely to the height of his temper. In other words, a man whose disposition allows sudden outbursts of anger to control his mental activity must run the risk of subjecting himself to periods of driving, or walking, in the case of a pedestrian, during which his impaired faculties place him in the category of nonessential contributors to the danger of others, not to mention the trick he is playing on the insurance company, should he by chance possess an accident policy covering his own person.

We contribute a portion of our income to taxes which are utilized for the erection of safety devices, and for the remuneration of police officers hired to protect us from the dangers attending the operation of an automobile, but the cheapest expedient of all—a good disposition—is passed by as something with which we have either been blessed since childhood, or, not possessing, as something we must unfortunately lack through the remainder of life, much to the discomfort of ourselves and that of our fellowman.

The City Manager

With the election nearing at which the people of Redwood City are to decide on the fate of the proposed new charter, it is well to consider what has been done in other cities with regard to the form of government proposed here—the city manager form. With the news that movements are under way for a city manager form of government in Philadelphia and Chicago, it is clear that larger cities are more and more turning to the city manager plan to solve their problems.

Richard S. Childs, president of the National Municipal League, cites Cincinnati, Kansas City, Rochester and Indianapolis as cities where such a form of government has been successfully employed.

Since 1912, 397 cities have adopted the city manager plan, Childs notes, and almost without exception savings to taxpayers and increased governmental service has resulted from the change.

"In a word, the city manager plan is the business principle applied to government," Childs declared. "A board of directors meets and determines policy, and hires a manager to run the business. If the manager does a poor job, he gets fired. If he does a good job, he remains in office. Consequently, his whole motive is to make a good record for himself.

"Contrast this situation with the usual one in governments. The first part of the time a man is in office, he spends worrying about to whom he should pass along the political plums. He is the subject of great pressure, for he has patronage to deal out. And most of his time is occupied with that sort of thing.

"The latter part of his term is spent in laying the political lines so that he may be re-elected. Between the two, where does the public come off?

"The city manager, on the other hand, is interested solely in making a good record. He knows that if he is able to render better service and cut costs of government, it will react to his own benefit. He need not worry a great deal about politics, because he will stand or fall upon the facts.

"Almost any city manager may be cited to prove that costs are reduced under that plan of operation.

"Notable examples that occur to me at the moment are Wichita, Kansas, and Rochester, N. Y. In Wichita, under the city manager plan, the city has the lowest tax rate in the State. One of the first achievements of the new government was the construction of a sewer by direct labor for $214,000 when the lowest contractor's bid was $316,000.

"In Rochester, before the city manager took charge, the city was running farther and farther behind every year, borrowing to meet current expenses. As a result a current debt of $2,918,000 faced City Manager Story when he took office. I see by a report made last week that the new administration closed its first year with unexpended balances of appropriations of $266,191, and excess receipts from sources other than taxation of $213,910, making a total of $480,101. This was in addition to $500,000 which had been provided for debt reduction in the budget."

Cleveland's experiences, also, shows that in practically every department of government, costs have been steadily reduced within the past five years of city manager operation.

Another example of the status of city manager cities, Childs cited, was the custom of one of the largest firms of consulting municipal engineers in the Middle West to quote a 20 per cent lower rate for work in city manager towns than elsewhere because of the greater expedition with which it can do business.

Food Fish Destruction

Shakespeare says, "The greatest study of mankind is man." As an example, apply this to fish. Thousands of dollars are spent and thousands of men giving their time and service to protect one of natures greatest gifts to man, "Ocean fish for food," yet we have the anomaly of laws permitting canneries to reduce to fertilizer and animal feed, thousands of tons of sardines annually. Canning of all foods should be encouraged to the fullest extent. It permits the use of today's surplus for future consumption but to permit the catch to exceed the canneries' capacity to preserve and allow conversion to fertilizer for the immediate profit of the few operators, is to disregard the future and coming generations will pay the penalty.

Sardines are food for larger fish and when the natural food is absent, the delectable fish that grace our table will migrate to parts where food is found and coming generations will know of fish only through museums and school books.

Our Little Friends Are Returning

HELLO DICKY GEE, I'M GLAD TO SEE YOU

The Editorial Circuit Rider

A Symposium of Editorial Coment From California Newspapers

By Clem Whitaker

Playday in the California press and a glorious epidemic of spring fever arrive simultaneously. Call it co-incidence, if you like, but we concur with the coffee publicists, "There's a reason."

Curiously enough, newspaperdom in the State passes over the pending Judge Hardy impeachment trial with hardly an editorial mention. The Mexican revolution brings forth a few editorial paragraphs but fails to compete with the broadside on life's lighter moments. The editor seems to be thinking and musing over the things that occupy the mind during lazy afternoons by trout pools, et cetra. And so be it, for the winter months have been heavy with logic and much discourse on tribulations of the day.

"The pedestrian is dead, long live the motorist" is the spring-time philosophy of the Hayward Review editor. And he says: "The Review is distinctly in favor of the idea that the pedestrian everywhere ought to be arrested everytime he tries to cross the street or the road or any-other artery along which an auto travels. Why should a human be like the chicken that always wants to cross the road? Why is a pedestrian anyway? Who and what is it that causes all the trffic congestion at corners? Who is it that causes most of the funerals and takes all the lodge men from their businesses to attend the obsequies? Pedestrians! It's about time that these two-legged animals that ought to wear four wheels, non-skid tires and travel on a different variety of gas, are jailed every time they step out of the house. The destruction of automobile lamps and fenders from people walking into them has become a public scandal."

And the Marysville Appeal-Democrat usually sobriety itself, chimes in: "'Widen out streets to 100 feet!' yells the city manager of a big city. He's an autoist who can't hit a pedestrian in a 50-foot street, like enough."

The San Francisco Examiner, however, steps out in the open, without qualification or justification, and declares that "California is divided into two unequal parts: Indoors and outdoors." He then sings this song of spring: "Indoors is the place for the bill collector to stay. Outdoors is all the rest of the State. It's the realm where Californians, including linnets, artichokes, golfers, pleasure boatmen, wild columbine, avitors, hurdlers, spreckled trout, sweet potatoes and all the rest of us, nobly and indubitably LIVE. A true Californian, when he's detained in the strait realm of Indoors, has the uneasy look of a kitten who has accidentally locked himself in the gas oven on a sunny day. GET OUT AND PLAY!"

But think of the poor preacher, who must needs sermonize each Sabbath day, whether the sun shines or not. The Circuit-Rider, being one of those things—a preacher's son—has thought of it often, but let the Exeter Sun tell the story: "Give a thought to your preacher He is a hard working man. During 1928, President Coolidge wrote 22 public speeches and messages to Congress. Those required much concentrated thought. The fact was remarkable and the work it necessitated was heavy indeed. But give a thought to your preacher. During 1928 he wrote 52 sermons. Each time has the congregation expected something new and true of him—something they hadn't heard before, couched elegantly, phrased interestingly. We only make the comparison to picture to you vividly the giant task that is required of every preacher, poor and rich, obscure or famous, of every denomnation, throughout the length and breadth of the land." It might be added, too, that the Exeter Sun's estimate is conservative. Most preachers preach twice each Sunday and frequently once or twice mid-week, not to mention daily lectures for their sons and daughters.

The Garber Star has another serious problem on its mind, i. e., specifications of the perfect woman! And it seemingly endorses this description, as penned by Charles G. Shaw, a spelalist on the eternal feminine for Smart Set magazine: "She must never be late for an engagement, and oh those occasions when she is not on time she must not, in wide-eyed amazement, burst forth with some idiotic remark about having no idea of the hour. She must not chew gum, talk politics, be a channel swimmer, recite Laurence Hope, dance the black bottom, wear rolled stockings or tell stories in dialect. She may be blonde, brunette, auburn or intervening shades. She must not, however, paint her ears nor wear her hat on the back of her head. She must periodically lapse into silences." And that, we agree, is indeed perfection.

That old refrain, "It might have been!" stirs the Hemet News to ponder the thoughts that raced through Senator Hiram W. Johnson's mind on inauguration day. It comments: "Hiram W. Johnson must have been thinking some long thoughts as he listened to the events of inauguration day. For he might have been the retiring executive rather than Mr. Coolidge. After the deadlock was broken at the Chicago convention of 1920, and it was known that Harding was to be the nominee for president, the vice-presidential nomination was offered to Johnson, who spurned the invitation to adorn the ticket as a caudel appendage. Had Senator Johnson's reply been affirmative, of course he would have succeeded to the presidency in 1923, and probably would have been the nominee of the party in 1924. Thus is history made. And it is not at all likely that the Republican party would have come to California for another presidential candidate last year if Johnson had been the retiring executive. Maybe Johnson thought, as did the poet, 'Of all sad words of tongue or pen, the saddest of these, it might have been!'"

Maybe so, but Harding lost his life in the presidency; Coolidge his son. And Hiram, at least, is alive and healthy, with the right to enjoy the springtime.

Prune Wins Popularity

Humble Prune Proves Favorite in State

By LAWRENCE MONFORT
Staff Correspondent, Redwood City Times-Gazette

SACRAMENTO, March 20.—(C. N.B.)—Dried and shriveled though it may be, the Santa Clara prune is still the favored Californian in the eyes of American housewives.

Not so handsome, perhaps, as the peach, his most formidable home-grown rival for the affections of Miss America, the prune is more than holding his own in good graces of women who buy the foodstffs of the nation, a survey just concluded by B. H. Critchfield, State-Federal market director, reveals.

While 80 per cent of housewives buy peaches, 84 per cent buy prunes, and what's more, serve them at all meals while peaches are chiefly restrcted to the dinner table, Critchfield's survey made during the past ttn months, shows.

Critchfield's inquiry, which involved interviewing 2555 housewives, 521 retail stores and 181 wholesalers and jobbers throughout the nation, was undertaken to solve problems of the canning peach growers and canners, and incidentally developed that prunes are not onyl the favorite of the nation so far as dried fruits are concerned, but still the most widely used California fruits of all.

So far as dried fruits are concerned, there isn't a shadow of a doubt of the prune's popularity, 9 per cent of women buyers prefer that dried fruit to all others.

Peaches have their problems, but these are not unsurmountable, Critchfield's survey shows. He advocates abolition of some can sizes, elimination of poorer grades for retail sizes, stressing of grades on labels, and above all else, a world-wide campaign of education to acquaint buyers with the fact that California peaches are super-fruit, and not to be approached for quality by any other comercially canned peach in the world.

The Thrill of Two High Speeds

Four Speeds Forward
Standard Gear Shift

The new Graham-Paige sixes and eights are distinguished by the thrilling performance of two high speeds, standard gear shift. With the time-proved, Graham-Paige four speed transmission—fourth, used most of the time, gives a new smoothness and swiftness; third, a quiet internal gear, provides rapid acceleration in traffic and up steep hills. The gear shift is standard—you start in second; first, in reserve, is instantly available but seldom used. You are invited to enjoy a demonstration.

GRAHAM PAIGE

Five chassis—sixes and eights—prices ranging from $885 to $2495. Car illustrated is Model 615 Coupe—six cylinder, 76 horsepower, 115" wheelbase, $1195 (special equipment extra). All prices at factory.

ROAD BILL BACKED BY GOVERNOR

Measure Would Fix Ratio of Roads in California

Backed by the unanimous endorsement of the Board of Directors of the California State Automobile Association, representing 85,000 motorists, Governor C. C. Young this week asked the State Senate and Assembly to pass legislation establishing a definite policy to keep California's State highways "out of politics."

That traffic and not political pressure shall govern future additions to the State road system, according to H. J. Brunnier, president of the motorists' association, is assured by a concurrent resolution to be considered in the Senate by Senator Fred C. Handy and in the Assembly by Assemblyman C. N. Jespersen.

Decision to call this legislation up for vote Monday was reached following a conference in Governor Young's office attended by Governor Young, B. B. Meek, director, State Department of Public Works; Senator Arthur H. Breed, Senator Fred C. Handy, Assemblyman C. N. Jespersen and D. V. Nicholson, assistant secretary, California State Automobile Association. It follows endorsement of the legislation Friday by the directorate of the association which first sponsored and sought to crystallize State sentiment in support of Governor Young's policy to add no new roads by reason of political pressure rather than traffic requirements.

The concurrent resolution which is expected, according to the association, to pass the legislature by an overwhelming majority in both houses, provides:

1. That no new roads shall be added at this session of the legislature and that future additions shall be justified by an economic and engineering traffic study by the State Highway Commission before inclusion in the State system.

2. That there shall be no change in the present statutory division of the secondary highway funds allocated on a fifty-fifty basis between the two major sections of the State under the Breed bills.

3. That additions totaling between ten and twelve per cent of the existing State highway mileage shall be added in the ratio of not less than three or four miles in the South to one mile in the North.

4. That the engineering and traffic study shall begin May 1, 1929, and that the report of the California Highway Commission shall be filed and made public August 1, 1930, to permit of analysis by the legislators of roads recommended for inclusion in the system prior to the forty-ninth legislative session in 1931.

5. That the mileage recommended for inclusion in the State system shall be included for budgetary purposes when the necessary surveys are completed but no money shall ve expended on same until they have finally been included in the system by legislative action.

The engineering and economic survey, which the California Highway Commission is directed to make by the concurrent resolution, will "embrace routes not now in the system which, either by reason of the large volume of State traffic which they are now carrying, or by reason of the relief that they would afford to heavy traffic upon present State highways, or as highways serving as important interstate links."

Preliminary investigations of the Highway Commission indicate traffic necessary for the addition of three or four times as much mileage n the South as in the North, according to Governor Young in his message to the Legislature. In this connection the Governor says:

"The present highway system, as built up during previous administrations, includes only 525 miles of secondary roads in the southern counties as against 1778 miles in the North. This means that whereas the North has 1778 miles over which to spread its allotment of secondary funds, the South has only 525 miles on which to use an equal allotment, thus requiring that untill this lack of balance is adjusted by taking in other roads which may qualify for a place in the State system, there must be an uneven development of the secondary system in the two ends of the State."

Many Speakers to Address Meetings on Education Week

SAN FRANCISCO, March 21.—Speakers of note in the educational field of California were announced today as participants in the tenth annual observance of public schools week, beginning April 22. The announcement was made by chairman Charles Albert Adams, in chrage of the annual observance, at State headquarters here.

Vierling Kersey, State superintendent of public instruction will be one of the principal speakers to discuss during the week at various meetings the importance of a closer co-operation between the community generally and the public schools system.

On the occasion of the ninth observation of the week last year over 500 meetings were held in public school auditoriums and community halls and the early reports this year indicate to the State committee that there will be even a larger number of meetings this year.

The general purposes of the week are concretely expressed in the statement of the general State committee:

"The American people are already firmly committed to a free public school system. What they want to know is whether or not the system is functioning as it should and if not, the reasons, therefor."

Exhibitions of the work of school students, to bring the work of the schools nearer to the parents and the community generally, will be one of the features in the week this year.

Among notable educators who will appear on different platforms during the week will be Tully Knoles, president of the College of the Pacific; Joseph Marr Gwinn, superintendent of schools of San Francisco; Roy W. Cloud, secretary of the California State Teachers' Asociation; Sam Cohn, chief deputy State superintendent of schools; Louis W. Smith, superintendent of school of Berkeley, and Charles Hughes, superintendent of schools of Sacramento.

CHRISTIAN SCIENCE

A free lecture on Christian Science wil be given tomorrow evening in the Burlingame High School Auditorium, at 8 o'clock. This lecture is given under the auspices of First Church of Christ, Scientist, Burlingame. The lecturer, John Randall Dunn C. S. B., is a member of the Board of Lectureship of the Mother Church, The First Church of Christ, Scientist, in Boston, Mass. The public is cordially invited to attend.

Sacramento—Division of Highways to award bids on $750,000 worth of road projects soon.

25 YEARS AGO

25 YEARS AGO

Times-Gazette, March 26, 1904

Miss Lenora Lane is visiting friends in Mountain View.

Edward Genochio is visiting friends in Halfmoon Bay this week.

Judge Buck is having the interior of his cottage on the island remodeled. A. J. Beer is doing the work.

Miss Belle Vallejo, who is attending high school here, is spending her week's vacation at her home in Halfmoon Bay.

Miss Cora Lovie entertained about 18 of her high school friends at her home on Thursday night. Games and singing were the order of the evening, and a very pleasant time was enjoyed by all.

The railroad company has put an extension on Lovers Lane so that pedestrians do not have to walk on the track on going to the depot by that way. A force of men have also been at work on the culvert near Knight's store, which was found to be too small to accommodate the mountain water which has been coming in such large quantities lately.

John MacBain has been awarded the contract for a $30,000 residence at San Mateo for D. F. Walker. It will be a beautiful structure and up-to-date in every particular.

CALIFORNIANS ARE ENTERTAINED BY SEN. SHORTRIDGE

D. E. O'Keefe

Many of those who accompanied the Palo Alto special train to Washington last month have returned to their homes in Sunny California, glad that they made the trip and delighted that they are once again in the land of flowers and cheerful sunshine. The excursion east was a most enjoyable one for the 98 citizens who left Palo Alto on February 26, bound for the capital to see Herbert Hoover, California's first president, inaugurated.

The special was in truth a triumphal procession of devoted Californians that would install California's favorite son in the White House. En route the special train received honors, the people vying with each other to show their esteem for the excursionists who demonstrated their loyalty to their State in crossing the continent and going 3000 miles to see their friend and neighbor Herbert Hoover, take the oath of office and receive the highest honor that can ever be bestowed on a human being. Such devotion is to be admired and commended.

The party was composed of a jolly, whole souled and patriotic set bent on having a good time and throwing dull care to the winds, for the time at least, and making the trip a memorable one.

Many widely known citizens of the peninsula and San Francisco accompanied the excursion among whom were B. W. Waters, assistant city engineer of that city; Mr. and Mrs. E. D. Connelly, formerly of Woodside but now residing at San Mateo; Franklin Swart, the popular district attorney of Redwood City, who enlivened the party by his clever sallies; D. E. O'Keefe of Menlo Park; Mr. and Mrs. Edward P. Cashel, chairman of the Santa Clara County Republican Committee; Mr. and Mrs. M. H. Hare, of the firm of Hare, Brewer and Clark, Palo Alto; Mrs. E. Wilson and her son, Carl; Mrs. Paul Shaup and her son, Jack; Mr. and Mrs. Paul Downing of San Francisco. Downing is a class mate of Herbert Hoover and is the vice-president of the Pacific Gas and Electric Company. Through his genius as an engineer the streams of the high Sierras were harnessed to produce current for the bay region. Another school mate was George W. Connors the well known highway builder of Santa Rosa. He is a distant relative of Judge Hannon of Redwood City, J. E. McDowell, formerly registrar of Stanford; Mr. and Mrs. Harry K. Wolfe, the San Francisco attorney. He acted as spokesman for the party and there being no clergy along Harry often functioned in offering invocations at the dinners given on the journey to the party. In both capacities he functioned well.

Dr. Susan H. Hamilton was the life of the party, by her shafts of wit and humor she had the crowd always in roars of laughter. The doctor lives in San Francisco. Mr. and Mrs. Frank Harris and their pretty daughter, Miss Velma Harris, were present from San Francisco. Mr. Harris is a brother of M. A. Harris, the popular mayor of Atherton. Leonard E. Read of the Palo Alto Chamber of Commerce was in charge of the excursion. He proved himself a very popular and efficient officer. The young man showed wonderful ability in handling the details of the whole affair. George B. Hanson, who was in charge of the train, won the hearts of everyone by his courtesy and tact in handling his task and catering to the wants of his pasengers.

The citizens of San Antonio showed their hospitality in receiving and honoring the Palo Alto excursionists by extending to them the freedom of their wonderful city and entertaining and lauding their guests from the shores of the Pacific. When the train was in twenty miles of the historic city a committee consisting of Col. W. E. Welsh, Captain Greenwall and a bevy of twenty pretty girls from West Morriand College came aboard to greet and welcome the visitors. Arriving at the city a sightseeing drive was enjoyed. The Alamo, where 165 Texans in 1836 held at bay 6000 Mexicans, the little group finally being annihilated by the superior number; the the beautiful grounds and garrison of Fort Sam Houston were shown the visitors. This cantonment is one of the largest in the country. It is the home of the famous second division. In the evening a Mexican dinner was enjoyed. The viands were so toothsome that several of the party indulged to the extent that they became ill.

The beautiful and attractive city of New Orleans was reached on Friday, March 1. The people left nothing undone to make the stay of the visitors from the Pacific Coast a pleasant one. A brass band met the special as it pulled in at the depot and at once played "California Here I Come" and "I Love You California." When "Dixie" was played the Southerners stood attention removing their hats, just as the Northerners do when the "Star Spangled Banner" is rendered. From the Roosevelt Hotel, the finest in the South, a committee in sight seeing buses pointed out all the interesting places and historic scenes in which New Orleans is rich. A banquet at the Roosevelt was enjoyed by the visitors. The train then departed for Atlanta. At Atlanta the party was met by the mayor and a committee of the prominent citizens who escorted the visitors around the beautful city showing them all points of prominence. Atlanta is a delightful and busy and prosperous community.

Leaving Atlanta the Palo Alto special dashed off to Washington, arriving there Sunday morning. The day was warm and inspiring, which lead the natives of the capital to remark that the Californians had brough the sunshine with them and that it would be fine weather for the big event on Monday but the predictions were all wrong for the next day it came down in torrents disappointing many who had hoped for a sunshiny day for the inauguration. Sunday afternoon the California delegation was given a dinner at the Willard Hotel, one of the finest hosteleries in Washington. National Committeeman W. H. Crocker, Mr. Mayer of film fame, addressed the Californians had been looking formaster. The speech of welcome was made by Senator S. M. Shortrdge. In a few well chosen words the Senator welcomed his friends and neighbors to the capital city of the nation. He was gracious in his eloquent remarks. Congressman Arthur Free also greeted the delegation in a short but nicely phrazed address.

Monday, the big day for which the Californians had bee looking forward to with anticipation, the day which would see a Californan in the White House, arrived. The Californians had secured positions of vantage so that they saw the inaugural ceremonies in its fullness. They saw President Coolidge accompanied by the President-elect, Herbert Hoover, ride down Pennsylvania avenue to the Capitol. Witnessed both go up the steps of the Captol, saw Hoover take the oath of office administered by Chief Justice Taft and heard the new president deliver his eloquent message. Then there was a dash to see the parade. The Californians had seats in a viewing stand very close to Mr. Hoover and the Vice-President. When the parade started up Pennsylvania avenue the rain poured down unmercifully, but the visitors from the Coast remained until the last feature of the big pageant passed, all becoming drenched. A rush was then made to the capitol where Senator Shortridge announced a buffet luncheon for his friends from the Golden State.

In his nicely furnished and spacious committee room luncheon was served to three hundred Californians. Senator Shortridge was delighted and extremely happy in greeting his friends and bidding them welcome to the scene of his labors. All the Californians are loud in their praises of Senator Shortridge for the cordial manner in which they were entertained while in Washington. Senator Shortridge is one of the most popular senators at the capital, having a record for ability, statesmanship and sound judgment in governmental affairs. He is one of the outstanding figures of the nation. The Senator is very close to the new president and will have much to say regarding Pacific Coast affairs.

Next day the California delegation was received at the White House by the President, who cordially greeted his friends from the Coast. He was presented by Harry Wolff with the ballot box containing the original ballots cast at Sacramento for Herbert Hoover. After the presentation the delegation was shown through the historic dwelling. Congressman Arthur M. Free presented the President with suitable resolutions. Free gave the Californians his full attention, entertaining them and personally showing them the points about Washington. Free is a big man at Washington, highly esteemed by his colleagues. He stands high in the estimation of the President and is a big asset to his district at Washington.

President Hoover has the confidence of the people of the country. All look to him to solve the great problems now confrontng the country. He will measure up to the expectations of his countrymen.

Ray Lyman Wilbur, Secretary of the Interior was visited by his friends from Palo Alto. He is an able man and during his short time in Washington has made many friends.

MENLO PARK

Patrick Jennings Bryan for the past six years the efficient sexton at the Church of the Nativity left on Sunday last for Portland to accept a lucrative position there. While here Mr. Bryan made many friends who are loath to see him go. He has the very best wishes of everyone in the community for success in the north.

The engagement of Miss Josephine Beltrano, the charming and pretty daughter of Mr. and Mrs. John Beltrano residing on Glenwood avenue, and J. W. Beltrano of San Francisco has been announced. The marriage will take place right after Easter. The young couple will reside in the city.

Judge Clough has had plans prepared for an eight room dwelling to be erected on a beautiful knoll on his property at Los Gatos. When the structure is completed Clough intends to move from Menlo Park. Mr. and Mrs. are highly esteemed here and it is with regret that the news of their departure is received.

St. Joseph Alumi will give a food sale on Easter Saturday. Home made cakes and pies will be offered for sale and a bevy of the prettiest members of the organization will be in charge.

John Doyle is erecting a modern cottage on his property on Menlo avenue. He contemplated erecting another bulding on Florence street. There is a big demand for this class of dwellings.

Several marriages of local society leaders are to be announced after the Lenten season. All are on the qui vive to learn who the fortunate ones are.

J. E. Strong, the tailor, has moved from the Kearny building where he has been for the past 12 years to a building on the highway adjoining the Menlo Grocery.

Dan Powell, an old timer in this community, passed away at the Community hospital last Monday following a long illness. The deceased for many years prior to his death worked for many years for J. J. Murray at his home in Stanford Park. He was a resident of the county for 40 years.

St. Joseph Alumni Association will receive communion in a body at the Church of the Nativity Sunday morning at the 8 o'clock mass. A breakfast will be served at Cafe de Paris after the services.

The beautiful home of Mark A. McCann, near Valparaiso avenue, was sold this week to Felix McGinnis, passenger traffic manager of the Southern Pacific Company, who will occupy the estate on June 1. Although the home consists of fourteen rooms and very attractive and wonderful grounds, it is undertsood that Mr. McGinnis is to expend a large sum in making additional improvements. McGinnis occupied E. W. Hopkins estate, now owned by Attorney White, last season. The McGinnis family is quite an acquisition to the community.

Mr. and Mrs. McCann and their pretty daughter, Betty, will most likely make a tour of Europe during the year, and on their return may locate at Atherton.

Les Murray, for several years superintendent at the base hospital, has gone to Walla Walla, Washington, where he s engaged in business. He is accompanied by his wife and child. Murray has taken over the canteen at the cantonment at that place. The barricks are the largest on the coast.

J. Hoss, Secretary of State of Oregon was here this week on a visit to his brother, J. B. Hoss, the baker. The Oregon official will most likely be a candidate for governor at the next election. He is to address the students of Stanford this week.

The wooden steps leading to the New Masonic Hall are to be replaced by iron ones. A fire escape is also to be placed in the hall so that the auditorium will be modern in every way.

Capitol Letter

CAPITOL NEWS BUREAU

Sacramento, March 20.—Running neck and neck for the title "The House of a Thousand Scandals," Assembly and Senate today neared the end of their seventh week of 1929 sessions with neither sure of victory.

Credited as starting in the lower house but destined to end in the upper is the Hardy-Aimee love gift investigation, centering in impeachment of Judge Carlos S. Hardy of Los Angeles, but with most of the glamour of publicity clinging like a halo to that super-evangelist, Mrs. Aimee Semple McPherson. The Senate, too, is making a great todo of its investigation of the so-called cement trust, having ordered executives of ten leading Californians to jail while it prepares for deeper probe, and also has a lively time ahead as the result of charges and counter charges flying around the heads of Fish and Game commissioners and the Associated Sportsmen, the latter organzation, having appologized handsomely for printing an article at which senate fish and game committee members took umbage, has restirred matters by filing four affidavits involving at least one former assemblyman in charges of wining and dining and other unseemly conduct in connection with wanted legislation.

Not to be outdone, the Assembly is pressing charges of political plotting in connection with the threatened arrest on the Assembly floor of Willard E. Badham, member from Los Angeles for failure to file election expense accounts on time, with investigation threats against J. W. Buzzell, Los Angeles labor council secretary. And in either house a half dozen or so tax investigations are threatening.

Outside of codification of law and authority to be granted a commission of nine to study important legislative proposals, the lawmakers are evincing no desire to make radical changes in California school legislation.

Members of both houses say they are literally being swamped wth individual protests against the so-called county unit plan as carried in the Baum bill, which at last reports was showing no signs of stirring from its bed in Assembly committee. Its chances of passage are slight, and of being signed worse, say its opponents, who place the county unit proposal in the classification of "important measures" which the administration-backed committee of nine would investigate.

If there is any definite reaction to the Indian bill to make Sacramento Junior College a full-fledged four-year course institution, it is adverse. Naturally, the University of California does not favor such a change, and say legislators, they fear that if all junior colleges should, metaphorically speaking, put on long pants, communities surrounding them inevitably would be heavily taxed for their support.

The gas tax is a crude and inefficient source of road-building funds compared to the plan which Senator George Rochester of Los Angeles hasn't yet got out of committee calling for a tax of five cents per 100 pounds on all highway buildng materials such as sand, gravel, cement, asphalt and the like. Rochester would pay the taxe to the State road fund, but hasn't computed how many more millions it would raise than the three per cent gas tax. Water is the only ingredient of concrete highways which Rochester does not propose to tax.

Just about as certain of becoming law as the succession of day and night, the administration amendments to the motor vehicle act are clamoring for attehtion from the Senate as soon as they can be heard. Passed by the Assembly, this sheaf of bills provides for compulsory instruction in public safety and accident prevention by public schools and teachers' colleges; requires revocation of licenses for failure to satisfy damage or injury judgments with maximum automobile penalties for driving after revocation or suspension; compulsory ownership of public liability insurance carried at times of license issuance; making parents responsible for acts of minors and government for acts of agents.

These measures have the endorsement of the State's two leading automobile clubs and the administration.

The Easter Outfit
Reflects the Charm of the Season

The welcome freshness of spring calls for the complement of a new wardrobe to put the wearer in tune with the season. Here, in apparel, in millinery, shoes and accessories, the smart woman will find the most attractive new styles.

It is gratifying to be able to choose the outfit in its entirety in one store and at prices that makes it possible to assemble a complete wardrobe at moderate cost.

Flannel Sports Coats in Tan, Green, Peach, Yellow and Blue $15.00
Tweed Coats $17.50

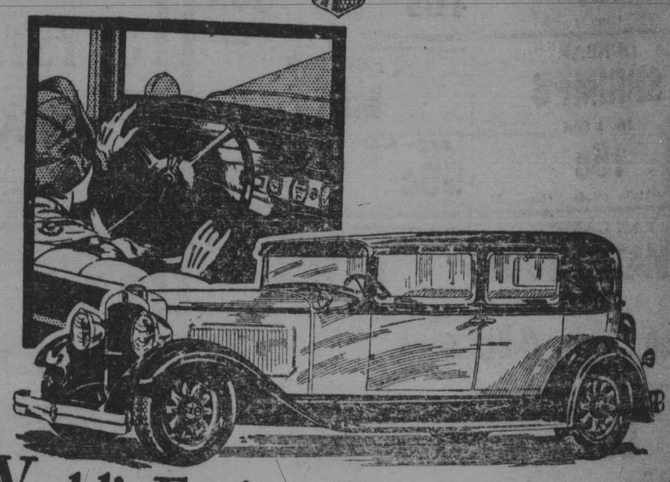
FROM NINTH TO FOURTH PLACE IN SIX MONTHS!



World's Easiest Driving Control

NO OTHER CAR in all the world controls quite so easily—with such complete lack of effort—as the new Nash "400".

Nash engineers have developed a new steering mechanism to achieve this result. An ingenious arrangement of roller bearings and a roller-tooth traveling in a worm gear, reduces friction to a minimum hitherto thought impossible.

Women drivers find new help and gain new confidence in parking. Little effort is needed to bring the "400" up to, or away from, the curb.

Gear shifting is just as easy. The "400" clutch pedal depresses at a touch, scarcely resisting the weight of your foot. The conveniently placed shifting lever moves smoothly, easily, from one speed to another.

If you ever find that driving a car tires you, try driving a Nash "400". It will give you an entirely new conception of how effortless, how pleasurable, motoring can be!

The New NASH "400"
Leads the World in Motor Car Value

IMPORTANT "400" FEATURES—NO OTHER CAR HAS THEM ALL

Twin-Ignition motor
12 Aircraft-type spark plugs
High compression
Houdaille and Lovejoy shock absorbers (exclusive Nash mounting)
Salon Bodies
Aluminum alloy pistons (Invar Struts)
New double drop frame
Torsional vibration damper
World's easiest steering
7-bearing crankshaft (hollow crank pins)
Bijur centralized chassis lubrication
Electric clocks
Exterior metalware chrome plated over nickel
Short turning radius
Longer wheelbases
One-piece Salon fenders
Clear vision front pillar posts
Nash Special Design front and rear bumpers

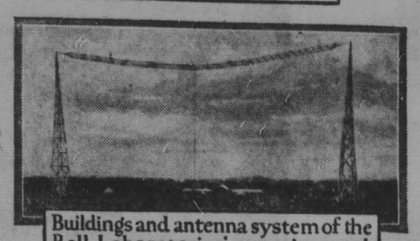
ommunication for Plane N vigation Studied by Telephone Engineers

Cabin Laboratories of the Monoplane used in experimentations

The Bell Telephone Laboratories Monoplane



Buildings and antenna system of the Bell Laboratories experimental station at Whippany, N.J.

pecially Equipped Airplane a Flying Radio Laboratory Operated in Conjunction With Whippany, N. J., Experimental Station.

By C. E. DEAN

NE indication of the importance of radio in the progress of aviation is the fact t the Bell Telephone Laboratoe have initiated a program of search and development for the fection of radio methods and aratus for aircraft. With the tinued advance of aviation, flyon schedule, in accordance with ounced times, will become inasingly necessary and means combating bad weather will be reatest importance. At such land-markers and lights can be seen, and dependence must placed on instruments and the . For this reason, radio will an important means for mainning airplane schedules in the re.

order to carry out this rech and development work, the Laboratories have purchased irplane and equipped it as ing radio laboratory. It is operating in conjunction with powerful experimental radio ion at Whippany, N. J. Sev- lines of investigation have begun. In this work the eners will have the advantage of erience with radio developts during the war and also the lts obtained with radio extens of the regular telephone sys, such as the transatlantic serv-

general study of radio transsion between airplanes and the und is the purpose of one line investigation. With the appaus in the airplane exact measments can be made of the effiy of radio transmission from Whippany station at various udes, distances and directions, various times of the day and r, and under various weather ditions. This work will yield lts important in all classes of plane radio, whether telephone, graph or radio compass signals. Discussing the future of radio in nautics, Edward B. Craft, Exive Vice President of the Bell phone Laboratories, writing in cent number of "Aviation," ted out that undoubtedly one the great services of radio will the broadcasting of information dealing with weather conditions and other matters of general interest to all planes in the air. For this work, radio telephone equipment is much superior to radio telegraph because of the great amount of training required to produce a good telegraph operator. In addition to such broadcasting for the benefit of all planes in the air, radio beacons, by which location and direction to fly may be obtained, will be another valuable aid to all aviators.

Two-Way Communication

However, for many purposes, Mr. Craft continued, two-way communication is very desirable. With this a pilot in the air can speak directly with a meteorologist on the ground and plan his route to the destination. In case he is instructed to land at another field, due to fog conditions, he can confirm the receipt of instructions. For these communications, in the same way as for one-way broadcasting, the radio telephone is far superior to the radio telegraph as a practical means of communication. On account of the limited number of channels in the intermediate portion of the radio band, it appears that the only place where there is prospect of a sufficient number of channels for this purpose is in the short wave region.

The first step of the telephone engineers in accomplishing short wave two-way radiotelephony was to conduct a field survey along one of the most extensive airways of the country. In the light of these findings they determined the best types of apparatus to build. The construction of this equipment is now in progress and its practical trial will soon take place.

Another likely need for two-way communication is in the direction of traffic at busy landing fields where many planes will be taking off and arriving. Here the air-port manager may have a radio telephone and instruct planes by radio when to alight and depart, and what parts of the field to use.

For long flights of exploration or across oceans, the disadvantage of the radio telegraph are offset by the fact that telegraph apparatus of a given power will carry further than telephone apparatus. So it is possible that on such long cruises, one or more expert telegraph operators will be carried for the sole duty of maintaining communication and taking radio compass observations.

Aid from Wire Communication

Besides radio, wire communication can render important aid to aviation. One way is a suitable rapid method by which a meteorologist can obtain, in a few minutes, weather reports by telephone or telegraph from a large number of distant points. The telegraph has long been used for this purpose by the United States Weather Bureau. More recently, rapid telephone methods have been developed and are now in experimental use. Another aid which wire communication can render is in providing connections between the various landing fields along a given airway. For this purpose the telephone typewriter, which prints out its messages at all receiving stations without requiring the attention of a clerk and does not require skill for use, is especially adapted. By means of this, planes can be dispatched, progress reported, the number of passengers and amount of baggage aboard reported to the next landing field, administrative orders as to particular pilots and particular planes can be transmitted, etc.

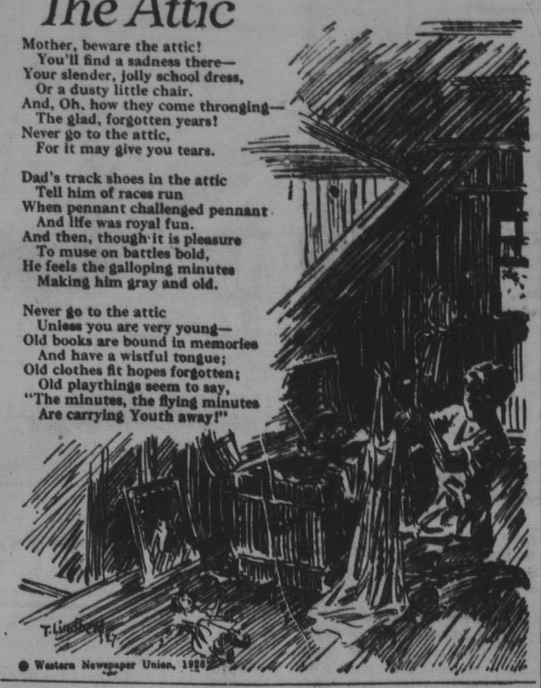
Another aid which wire transmission renders is at the emergency landing fields, which are located at intervals along our airways. Here telephones are provided ready to use. A pilot descending at such an emergency field goes immediately to the telephone and reports his difficulty without loss of time. Upon receipt of this information, a relieving plane can be promptly dispatched to take over the passengers and baggage for the completion of the journey.

In short, the rapid development of both radio and aviation and their present trend make it clear that in the future radio will be an important means of maintaining reliable airplane operation. Wire communication also will render important assistance in the successful operation of airways.

Songs of Plain Folks

By James Lewis Hays

The Attic



Mother, beware the attic!
You'll find a sadness there—
Your slender, jolly school dress,
Or a dusty little chair.
And, Oh, how they come thronging—
The glad, forgotten years!
Never go to the attic,
For it may give you tears.

Dad's track shoes in the attic
Tell him of races run
When pennant challenged pennant
And life was royal fun.
And then, though it is pleasure
To muse on battles bold,
He feels the galloping minutes
Making him gray and old.

Never go to the attic
Unless you are very young—
Old books are bound in memories
And have a wistful tongue;
Old clothes fit hopes forgotten;
Old playthings seem to say,
"The minutes, the flying minutes
Are carrying Youth away!"

The Bank and How to Use It

THE INTERNATIONAL BANKING DEPARTMENT

Part 1

The simplest way to describe the operations of the International Banking Department of the modern bank is to say taht it handles the bulk of the banking transactions that extend beyond the borders of the United States. It does virtually no domestic business.

The International Banking Department is concerned chiefly with the exchange of international credits, which is merely another way of saying that it helps to keep shipments of goods moving freely between the countries of the world, provides a domestic market for prime foreign securities, attends to the transfer of moneys to foreign countries by mail, telegraph and cable, collects bills from foreign sources and payable in the United States, and bills originating in the United States and payable by foreign creditors, and issues travelers checks and letters of credit.

When a man steps into a store to make a purchase it usually involves a cash transaction, the immediate delivery of the goods and the payment therefor. But the transaction, no matter what its size, becomes vastly more complicated when the merchant is in London, and the purchaser is in Watsonville or San Diego. If the same monetary standard existed in all countries and the coinage were maintained on an equal basis of weight and fineness the transaction would still be a simple one, but such is far from being the case. Thus we have the chief motive for international banking and foreign exchange. The bank, through its knowledge of exchange rates and differences everywhere, can handle the transaction for both merchant and purchaser much easier and quicker than they can handle it themselves.

The parity of exchange between the majority of countries is based on a comparison of the amount of pure gold contained in one unit, such as the American dollar, and the amount contained in the other unit, such as the British sovereign. For example, the pure gold contained in one dollar is 23.22 grains and in the sovereign 113.001597 grains. Thus the par of exchange between dollars and sovereigns is $4.86656 for each sovereign because there are 4.86656 times 23.22 grains in the sovereign's 113.001597 grains. The exchange is made on that basis, less incidental charges that cover the bank's return in the transaction and other expenses.

When a man in Burbank, California, wants to convert a certain number of American dollars into British sovereigns, for the purpose of paying a bill in London or Liverpool, he is not handed the foreign coin or currency over the counter of his bank. Instead he is given a draft in favor of his creditor in London and forwards such draft to him. As these drafts usually call for payment in the money of the country to which they are sent, the creditor can collect without difficulty. It works in identically the same way if he desires to collect a bill from a man in London, excepting that the process is reversed.

As an instance of the manner in which the International Banking Department helps to keep the trade lanes open and free for unlimited shipments, let it be supposed that a merchant in Fresno has ordered a bill of silk goods from Tokio or of tea from Shanghai. He wants his shipment without delay and the seller wants his money before the goods are shipped. The International Banking Department attends to the transmission of the payment first of all. It issues to the client what is called a commercial letter of credit which describes the kind and amount of the goods, the amount of money due and other vital facts relating to the shipment. This commercial letter is then cabled to a correspondent bank in Tokio or Shanghai, which correspondent pays to the shipper at the existing exchange rates the amount noted. The goods are sent then on their way. The whole transaction may take only a day or so.

At the Fresno end the department takes care of all details connected with the landing of the goods and their delivery to destination. This may include clearing them through the customs, the payment of duty, the payment of fire and other insurance and the handling of all documentary matters relating to the transaction. A mass of detail may be involved—detail that might tie up the shipper and the consignee for weeks or months if they attempted to handle the transaction without the aid of a bank. But the International Banking Department has simplified all of this detail to erally a hundred thousand times a the degree of an over-the-counter transaction. Repeat the process genday and it will be plainly seen how the banks with international departments keep imports and exports moving without a hitch over the trade lanes of the world.

IN THE SUPERIOR COURT OF THE STATE OF CALIFORNIA, IN AND FOR THE COUNTY OF SAN MATEO.

Action No. 15155

DORA WAGNER, Plaintiff

VS.

All persons claiming any interest in, or lien upon, the real property herein.. described or any.. part thereof. Defendants

FRANKLIN SWART, Attorney for Plaintiff.

The People of the State of California:

To all persons claiming any interest, in, or lien upon, the real property herein described or any part thereof, defendants, greeting:

You are hereby required to appear and answer the complaint of plaintiff, filed with the clerk of the above entitled court and county, within three months after the first publication of this summons, and to set forth what interest or lien, if any, you have in or upon that certain real property or any part thereof, situated in the County of San Mateo, State of California, particularly described as follows:

Lots 1-2-29 and 30 in Block 2, as designated on the Map entitled "THE ESCONDITE TRACT NEAR THE LELAND STANFORD JR. UNIVERSITY IN SAN MATEO COUNTY, CALIFORNIA," which map was filed in the office of the Recorder of the County of San Mateo, State of California, on February 26, 1889, in Liber "E" of Maps at page 33 and a copy entered in Liber 1 of Maps, at page 95.

And you are hereby notified that unless you so appear and answer, the plaintiff will apply to the Court for the relief demanded in the complaint, to-wit That it be adjudged that the plaintiff is the owner of said property in fee simple absolute; that her title to said property be established and quieted; that the Court ascertain and determine all estates, rights, titles, interests and claims in and to said property, and every part thereof, whether the same be legal or equitable, present or future, vested or contingent, and whether the same consist of mortgages or liens of any description; that plaintiff recover her costs herein and have such other relief as may be meet in the premises.

WITNESS my hand and the seal of said Court, this 29th day of January, A. D. 1929.

ELIZABETH M. KNEESE, Clerk
(SEAL)
By G. R. WINTER, Deputy Clerk

The first publication of this summons was made in Times-Gazette newspaper on the 1st day of February, A. D. 1929.

MEMORANDUM

The following persons are said to claim an interest in, or lien upon, said property adverse to plaintiff:

Geo. M. Mitchell and J. Dimmer, as trustees for Home Mutual Deposit - Loan Company, a corporation, address, San Francisco, California;

Home Mutual Deposit - Loan Company, a corporation, San Francisco, California.

First publication in Times-Gazette February 1, 1929; last publication, April 1, 1929.

IN THE SUPERIOR COURT OF THE STATE OF CALIFORNIA, IN AND FOR THE COUNTY OF SAN MATEO.

In the Matter of the Estate of DANIEL T. AMBROSE, Deceased.

No. 2087

NOTICE OF FILING PETITION FOR ORDER AUTHORIZING LEASE OF REAL PROPERTY

Ida J. Ambrose, Administratrix of the Estate of Daniel T. Ambrose, deceased, having filed herein her petition, duly verified, praying for an order of this Court authorizing, empowering and directing her, as such administratrix, to execute an oil and gas lease to the Shell Oil Company, a California Corporation, for the purpose of exploiting for mineral oils or petroleum and gas the interest of the estate of said deceased, to wit, a one-twentieth (1-20th) interest, in that certain real property situated in the counties of Kern and San Luis Obispo, State of California, and more particularly described as follows, to wit:

Lots 1, 2 and 3 and S½ of the N. E¼, and N½ of the SE¼, the SE¼ of the SE¼ of Section 1, Township 27 South, Range 17 East M. D. B. & M. San Luis Obispo County. The E½ of the SE¼ of Section 26, the S½ of the NE¼ of Section 34, the NE¼ of Section 35, and the NW¼ of Section 36, all in Township 26 South, Range 17 East M. D. B. & M. in Kern County,

upon the conditions of a lease, a copy of which is anexed to said petition, marked "Exhibit A" and by reference made a part thereof, reference being hereby made to the said petition and form of lease thereto anexed for further particulars.

NOTICE IS HEREBY GIVEN that the hearing of the said petition has been fixed by the Clerk of said Court for THURSDAY, the 21st day of March 1929, at 10 o'clock A. M. in the courtroom of said Court (Probate) at the Court House, at Redwood City, County of San Mateo, State of California, and all persons interested in the estate of said deceased are notified then and there to appear and show cause, if any they have, why the order prayed in the said petition should not be granted.

Dated, Redwood City, County of San Mateo, State of California, this 6th day of March, 1929.

It will be necessary to elect one trustee at large for three years.

The polls will be open between the hours of 8 o'clock A. M. and 8 o'clock P. M.

The officers appointed to conduct the election are:

THOMAS STOTT, Inspector.
CORA E. CLUTE, Judge.
ANNA OLSON, Judge.

Dated February 27, 1929.

WALTER T. KELLOGG, President.
D. W. WILLIAMS
J. D. HEDGE, Secretary.
Sequoia Union High School District

Elections will also be held in each elementary district of the high school district at the time specified on the school of the above named district.

First publication in Times-Gazette, March 8, 1929; and last publication March 22, 1929.

NOTICE OF TRUSTEES' SALE OF REAL PROPERTY

WHEREAS, on the 19th day of December, 1927, J. H. STEPHENSON made, executed and delivered to SAMUEL F. HANNAH and WESTLEY WENTWORTH, as trustees, a certain deed of trust covering the real property hereinafter described, as security for the payment to SAMUEL F. HANNAH and WESTLEY WENTWORTH of the sum of Eight Hundred Fifty Dollars ($850.00) with interest thereon from said 19th day of December 1927, according to the terms of certain promissory notes of even date therewith executed and delivered by said J. H. STEPHENSON to the said SAMUEL F. HANNAH and WESTLEY WENTWORTH, which said deed of trust was recorded in the office of the County Recorder of the County of San Mateo, State of California, on the 28th day of December, 1927, in Volume 232 of Official Records at page 178 thereof, and

WHEREAS, by the terms of said deed of trust a power of sale is conferred upon the said SAMUEL F. HANNAH and WESTLEY WENTWORTH, as Trustees, such power to be exercised by them after the breach of the obligations for which said deed of trust is security, as more fully appears by said deed of trust, and

WHEREAS, the said J. H. STEPHENSON was on the 19th day of September, 1928, in default in the payment of the principal sum owing under said promissory notes, to-wit: The sum of Eight Hundred Fifty Dollars ($850.00), and interest thereon at the rate of 8% per annum from the 19th day of December, 1927, and that said default had on said 19th day of September, 1928, continued for a space of more than thirty (30) days, and

WHEREAS, demand had prior to the 19th day of September, 1928, been made upon said J. H. STEPHENSON by said SAMUEL F. HANNAH and WESTLEY WENTWORTH for the payment to said SAMUEL F. HANNAH and WESTLEY WENTWORTH of said principal and interest as aforesaid, and,

WHEREAS, payment of said principal and interest as aforesaid by said J. H. STEPHENSON to said SAMUEL F. HANNAH and WESTLEY WENTWORTH has not been made, nor any part thereof, and by reason thereof the said J. H. STEPHENSON has breached his obligations for the performance of which said deed of trust was executed and delivered as security as aforesaid, and

WHEREAS, the said SAMUEL F. HANNAH and WESTLEY WENTWORTH, as trustees and as beneficiaries under the terms of said deed of trust hereinbefore referred to and the holders of said promissory notes secured thereby, because of said breach and default of said J. H. STEPHENSON, as hereinabove set forth, pursuant to the terms of said promissory notes dated December 19th, 1927, and on the 19th day of September, 1928, elected to cause the real property hereinafter described to be sold to satisfy the obligations due from said J. H. STEPHENSON to said SAMUEL F. HANNAH and WESTLEY WENTWORTH, which said obligations are secured by said deed of trust as aforesaid, and

WHEREAS, the said SAMUEL F. HANNAH and WESTLEY WENTWORTH did on the 19th day of September, 1928, execute a notice of said breach of said obligations secured by said deed of trust and of said default and of the election of said SAMUEL F. HANNAH and WESTLEY WENTWORTH to cause the said real property described in said deed of trust to be sold to satisfy the obligations secured thereby, and did record said notice in the office of the Recorder of the County of San Mateo, State of California, on the 22nd day of September, 1928, in Volume 269 of Official Records at page 383 thereof.

NOW THEREFORE, pursuant to the said notice and demand and in accordance with the terms and under the authority of said deed of trust, the undersigned Trustees hereby give notice that default has been made in the payment of the principal and interest of said promissory notes and in the payment of the indebtedness secured by said deed of trust, and that on Tuesday, the 26th day of March, 1929, at the hour of 11:00 o'clock A. M. of said day, at the front steps of the County Court House of the County of San Mateo, City of Redwood City, County of San Mateo, State of California, the said Trustees will sell at public auction, to the highest bidders for cash, the hereinafter described real property, in order to accomplish the objects of the trust in said deed of trust provided. All bids and payments shall be made in lawful money of the United States of America at the time of said sale. The beneficiaries under said deed of trust or any other person may purchase at said sale.

The real property hereinabove referred to and in said deed of trust described, is situate in the County of San Mateo, State of California, and is more particularly described as follows, to-wit:

Lot Numbered Ten (10) as shown on that certain Map entitled "Barney Park, San Mateo County, California," filed in the office of the County Recorder of San Mateo County, October 6, 1922, in Book II of Maps at pages 10 and 11 thereof.

Dated: February 18th, 1929.

.P. Announces Low Fares For Saratoga Fete

The Saratoga Blossom Festival, aturing the flowering orchards of e beautiful Santa Clara Valley, ives promise this year of drawing e largest crowd in the history of e annual event, according to F. S. McGinnis, passenger traffic manager of the Southern Pacific Company.

McGinnis' prediction is based on eports from the railroad's repreentatives of wide-spread interest in e festival to be staged at Saratoga n Saturday and Sunday of this week. Unusually low roundtrip excursion fares for the occasion have been authorized by the Southern Pacific from San Francisco, Oakland, Berkeley, Alameda, San Jose, Gilroy, Los Angeles, Santa Cruz and intermediate points.

This year's blossom time program will present many original ideas of pageantry. A ballet entitled "Flora's Awakening" will be given by 100 children in Saratoga's natural amphitheater on Saturday afternoon. The Sunday program will open with the picturesque "sunrise service" inaugurated with the founding of the festival more than 25 years ago.

BE IN SHAPE FOR EASTER

In the spring of the year we sometimes feel sluggish and attribute it to an attack of spring fever. Really, it is only a little something that is out of adjustment. Usher in the Easter Season by feeling fine and fit. Chiropractics is the easy road to health.

Funeral Held For Mrs. Chiappelone

Funeral services were held Monday morning at Mt. Carmel Catholic church for Mrs. Mary Louise Chiappellone, who passed away Saturday at her home on Arch street. A requim high mass was followed by interment in the Italian cemetery at Colma.

Mrs. Chiappellone was a native of Italy and was 64 years of age. She had been a resident of this county for almost 20 years. She had seemed to be in good health, and passing was a severe shock to her family and many friends. Mrs. Chiappellone was devoted to her home and family and a great part of her time was spent in caring for the flowers with which she surrounded her home.

She was a widow of the late Giacomo Chiappellone and is survived by seven children, Mrs. Julia Harris, Anthony, Daisy, Victor, Richard, Amadio and James Chiappellone. Two brothers, one in San Francisco, the other in Italy also survive.

Atherton to Open Its New City Hall

Atherton's new city hall will be open for business on March 26. At this time the city council will hold the first meeting in the recently completed building which is considered as one of the finest city halls possessed by a city of like size in the State.

The new building represents an expenditure of $75,000. It is of the mission type of architecture, and designed to house the various functions of the city government including the office of chief of police, city court, office of city clerk and council chamber.

Since the organization of the city of Atherton the council has been meeting in the club house of the Menlo Circus Club. The meeting of the council on March 26 will adjourn from this location to the new city hall where meetings will be held in the future.

Building permits issued in San Francisco during February totaled $2,314,112.

WILL DEFEND RECORD

J. M. White, who will drive his American-built triplex, in a defense of the world speed title held by this car, on the racing sands at Daytona Beach. The present record, of 207.5 miles made while Ray Keech was driving, will be assaulted by many world-famous drivers including Maj. H. O. D. Segrave of England.

Is Aid to Aviators

Newark, N. J.—Mr. Televox, the mechanical man, has come to the aid of aviators by making dangerous landings on unlighted flying fields unnecessary.

In obedience to the note of a siren on an approaching plane the mechanical man turned on the flood lights at the Newark airport without the aid of human hands.

Mr. Televox, whose name freely translated, from the Greek and Latin means "distant voice," demonstrated his ability as an airfield attendant when in repeated tests he flooded the new airport with 24,000,000 candle power in response to the distant voice of a plane high in the air.

Pete Branson, air mail pilot, approached the field from various directions and at different altitudes in the test, turning on a wind-driven siren as he neared. Each time the sound of the siren reached the field, the mechanical man flashed on the lights.

The device which gives Mr. Televox the similitude of human response to sound is the combination of two recent inventions, the Knowles grid-glow and a vibrating reed selector. The vibrations set up in the reed selector when a sound of a certain pitch is impressed upon it are transmitted to the grid-glow, converted into electrical energy and amplified sufficiently to operate the switching mechanism of the flood lights.

DIPPING INTO SCIENCE

Why No Water in the Sun

Water is a compound of hydrogen and oxygen. These two elements are present in the sun. Why, therefore, is there no water in the sun? Because the intense heat prevents the two from combining. This is easily understood when we consider that we ourselves can force the hydrogen and oxygen of water apart with intense heat.

You Can't Dye a Dress with Promises!

You can't dye a dress—no matter how careful you may be—without real color. That's the idea behind Diamond Dyes. They are made to give you real service. They contain from three to five times more aniline than other dyes on the market.

Next time you want to dye, try Diamond Dyes. See how easy it is to use them. Then compare results. Note the absence of that re-dyed look; of streaking, or spotting. See how soft, bright, new looking the colors are. Then observe how they keep their brilliance through wear and washing. If you don't agree Diamond Dyes are better dyes, your dealer will refund your money.

The *white package* of Diamond Dyes is the original "all-purpose" dye for any and every kind of material. It will dye or *tint* silk, wool, cotton, linen, rayon or any mixture of materials. The *blue package* is a special dye, for silk or wool only. With it you can dye your valuable articles of silk or wool with results equal to the finest professional work. When you buy—remember this. The *blue package* dyes silk or wool only. The *white package* will dye every kind of goods, including silk and wool. Your dealer has both packages.

Diamond Dyes *Perfect results* *Easy to use*

Small Bit of Ground Worth Millions

This view of the oil well "forest" in the Signal Hill field near Long Beach, Calif., shows in the foreground a triangle of ground that is the most valuable in the country. The tiny plot, on which stands the derrick, has an area of about 1,518½ square feet. From it has flowed over $1,000,000 worth of oil and it now produces 800 barrels a day.

Relics of Old Race

Fairbanks, Alaska.—New evidence of an ancient race of Eskimos has been uncovered on St. Lawrence island in Bering sea by Otto W. Geist of the Alaska college at Fairbanks.

Geist, who is spending a year in explorations on the island, has forwarded to the college several stone axes which he believes were made by a race of cave dwellers centuries ago.

The discoveries are similar to those made last summer by Harry B. Collins of the Smithsonian institute. Collins found on Bering sea islands old villages and other indications of a civilization more pretentious than that of present day natives. Still other evidences of former days were uncovered during the summer by the Stoll-McCracken expedition of the American Museum of National History.

Stone implements found by Geist were uncovered where there had been a dirt slide on the north shore of St. Lawrence island. He said the axes reminded him of those used by prehistoric people in upper Bavaria, Germany. He added that none of the island Eskimos had seen anything like them, nor did they know what they were.

"Perhaps the age of these axes corresponds with the age of the human bodies excavated by Mr. Collins on Punock island," Geist said. "These bodies were found several feet below sea level. Since there is a jumbled mass of rock with cavelike rooms directly above this slide and there are several others near the site, I have advanced the theory that the makers of the axes perhaps lived in them and were real cave men."

SEEN BUT NOT HEARD

By THOMAS ARKLE CLARK
Dean of Men, University of Illinois.

"Children should be seen but not heard" was a maxim which was regularly dinned in my ears during the period when I could still be reckoned a child. It was not expected that we younger members of the family should have any active part in the social activities of the family. When company came we were expected to speak courteously with the guests, but if we remained in the room, which we seldom did if we could get out of it, we were expected to maintain a decorous silence. It was the same way at church. As far back as my memory goes we were not considered too young to be taken to the morning service, but no foolishness was allowed, no conversation could be indulged in. We might go to sleep upon mother's arm if the sand man scattered too much dust in our eyes, but if we cried we were taken out and given the attention which such irregularities or derelictions merited. Children were not supposed to cry or to attract public attention in the old days, though they were much more frequently seen in public gatherings than at the present time, and somewhat more under parental control, I venture to say.

I had gone over to Dayton, Ohio, a few years ago to listen to a minister whom we were considering as a possibility for the church of which I am a member. My coming was unannounced and I seated myself in a remote corner of the audience room lest I should attract undue attention. During the entire service a child of three or so, rioted up and down the main aisle, planted himself at intervals upon the pulpit steps, and with much vocal enthusiasm expressed his appreciation of the freedom which he was enjoying. I got little of the discourse and less of the musical program so much was I taken up with the performance of the child. After I had eaten my luncheon I called on the parson.

"How did you enjoy the service this morning?" he inquired solicitously.

"I didn't get so very much of it," I had to confess. "I was watching that incorrigible infant cavorting about and raising general cain."

"It was my child," he admitted after a moment's hesitation.

"He has an active body and good lungs," I said as graciously as I could, but I did not add that he had probably not had impressed upon him the maxim of being seen and not heard.

There were ten thousand people in the audience room at a public gathering I recently attended and the speaker was trying his best with the aid of a loud speaker to carry his message to everyone. Up in the gallery was a baby, restless and irritated at times and given to vocal expression. At the most impressive moments of the speaker's discourse the baby would cry out and ten thousand faces were instantly turned in his direction. He needed no amplifier, so shrill was his voice, to carry his revolt to the remotest corner of the hall. And all the time the mother sat apparently unperturbed with her child the center of attention.

Old Country Doctor Is Hard to Find Now

Jefferson City, Mo.—The old country doctor, who drove through any kind of weather at any time of he day or night to minister to his patients, is disappearing from Missouri.

A survey conducted by Dr. James Stewart, state health commissioner, shows that there are too many medical practitioners in the larger cities of Missouri while the number is diminishing in the rural districts. There is one physician for every 400 persons in the urban sections but only one for every 865 persons in the rural districts. Doctor Stewart learned.

FOR THE OUTDOORS

Smart to a degree is this sports frock with its excellent red knitted blouse of silk and wool and its white tailored flannel skirt. With this compose Lois Moran, the lovely young Fox films star, who is an "outdoor girl," wears a white wool scarf and a white French felt hat, close-fitting. White kid shoes, with military heels, complete the costume.

Business Maxim

When a carefully considered plan promises success, never hesitate to take the chance.—American Magazine.

Human Weather Vane

Washington.—Of all the queer jobs in the world probably none is stranger than that of official weather vane. Imagine having a position at a fair salary with nothing to do but to tell in which direction the wind is blowing—or likely to blow! This job exists at the weather bureau of the United States Department of Agriculture here and it is a busy one, for numbers of people all over the country write in to find out in what direction the wind is coming from!

The inquirers are not humorists, professional or otherwise, who have nothing else to do and want to stir up a little annoyance and excitement. They are people with serious interests in life. The maxim that it is an ill wind that blows nobody any good has in a measure been adopted by the human wind indicator at the nation's capital. It is his business to find out if any air disturbance, variously known as a zephyr, a gale or just plain wind, is going to work any one any harm.

Those especially interested in determining air currents have specific objects in view, such as to find out the prevailing direction of a wind in a certain locality in which a glue factory or a garbage disposal plant has been or will be established. Officials of a city government, the heads of a manufacturing plant, real estate dealers or mere householders may all be interested in determining the prevailing direction of winds in a given region.

And so the party interested sits down and writes a letter. The letter goes to the weather bureau and the human weather vane gets to work. It becomes his business to find out and report on all the actions of the suspected and, maybe, guilty air current. In other words, it is his business to know from which quarter of the earth a wind is likely to emerge and how often it may do so within a specified time.

Of course, if it is a no-account, shifty, unstable wind, or one that is likely to blow from all quarters at once, why he is supposed to know that, too. Anything is welcome to the inquirer if it sheds light on the kind of wind he or she is interested in. This sought after information may persuade the writer to buy or not to buy property in a location that the winds adversely affect.

"A steady stream of letters flows in to us from interested people seeking information on a wide variety of subjects," said a weather bureau official recently. "Immediately information may be wanted on the current or seasonal weather, or more particular facts concerning the climate or prevailing weather conditions of a particular locality.

"City governments and manufacturing plants often want to know the normal direction of the winds in a given region with reference to locating plants that give off undesirable odors in such a way that near-by dwellers will be least concerned.

"Statistics of wind force and direction assist also in the installation of water supply systems to be operated by windmills; in determining the origin of fires from flying sparks, or in avoiding such fires by proper placing of chimneys; in ascertaining the pressure to which buildings will be subjected under stress of heavy storms and the surface movement of lake waters in connection with the disposal of city sewage. Sometimes this part of the bureau serves the useful purpose of warning would-be real estate purchasers of conditions they had not inquired into with enough diligence.

Titled Beauty Turns to Modeling Dresses

London.—Mayfair's trek from bridge to business has gained another recruit. The countess of Erroll is shortly leaving England to become a manikin for a Paris dressmaking firm.

Lady Erroll, wife of the earl of Erroll and a sister of the earl de la Warr, is noted for her gift of wearing clothes beautifully. It is said that the simplest frock becomes distinguished when she puts it on, and a Paris dressmaker once offered to dress her for nothing if she would wear only his creations.

Her initiation into the manikin parade will be made at Cannes, where she will show dresses for the famous designer, Captain Molyneaux.

HANDS ARE PERFECT

Miss Germaine Bajot of New York, whose hands won the Procter & Gamble prize as the most beautiful in photographic art, in the first contest of the kind, held in the art center. Entries were made by leading photographers of pictures of the hands of women prominent in society and on the stage.

Woman Will Carry Mail in Mountains

Luray, Va.—Miss Carrie Shenk of this county, who has been appointed by the Post Office department service to fill a vacancy on route No. 1 from Kimball, will be the only woman rural carrier in northern Virginia. She began serving the 24-mile route February 18.

The Kimball route is almost entirely in the Blue ridge, and crosses one stream of water 18 times in ascending and descending the steep mountain grades, at times covered with snow and ice. The road in many places is dangerous on account of ice during the winter months.

Singing Towers

St. Rombold's Singing Tower, Malines.

(Prepared by the National Geographic Society, Washington, D. C.)

THE dedication by President Coolidge recently of a carillon or tower of bells in Florida centers attention on these sources of music and on the region in which they were developed: a strip of land that extends from the North Sea shores inward for 50 miles or more in plains which are largely just above high tide.

On every side one sees scores of cities, towns, and villages. In the foreground these are clearly defined, but in the middle distance they become less distinct, and on the horizon in soft and misty outline they almost disappear. In every such extended view, above town hall and city gate and ancient church, rises dominant here a rugged tower, there a tall belfry or a graceful, slender spire. And each of these skyward-soaring structures becomes for the traveler a singing tower if, on nearer approach, he finds it crowned with that majestic instrument of music called a carillon.

The word "carillon"—pronounced "car' i-lon," with the "o" as in "atom"—and the derivative, "carillonneur," are French in origin, but now generally accepted in English.

Landing at Rotterdam, one finds the tower of St. Lawrence's church, whose old bells make not merely a great musical instrument, but by their melodies express the spirit of the country over which they sound.

The traveler should mount the circular stone stairway leading to the heights of tower after tower to see the bells of carillons in all their beauty of decoration and arrangement. He finds himself among a great company of bells, fixed upon a heavy framework and extending in parallel rows, tier above tier, completely filling the great tower room.

Bells Ranged in Tiers.

The little bells hang in the highest tier; the big bells just clear the floor; the intermediate sizes hang in tiers between. The largest bell of all is taller than a tall man and it may weigh four, five, or even six or eight tons. The smallest bell has a height of 10 or 12 inches only and perhaps a weight of less than 20 pounds.

Soon it is realized, however, that of greater consequence than number, or size, or weight, is the pitch relationship of the bells; for the bells of a carillon always progress by regular semitone or chromatic intervals. The carillon of St. Lawrence's tower has these intervals complete through more than three octaves, except that the two lowest semitones are lacking.

The arrangement and character of the bells first attract the observer's attention. Then he begins to study how the music is produced. He soon discovers that a carillon is played in two ways:

First, automatically by a revolving barrel connected with a tower clock, which starts the music at the hour, the half hour, and at the quarters, and sometimes even at the eighths.

Second, by a trained musician, a carillonneur, seated at a keyboard like that of an organ. Six and even more notes can be struck in chords on the carillon keyboard, and, so delicate are the adjustments, that sustaining tones on the lighter bells are easily accomplished by "tremolando."

Automatic playing of simple folk songs, chiefly on the light bells, with now and then the addition of a deep bass tone, is what the traveler constantly hears as he wanders through old towns in Belgium and Holland.

The tower of St. Lawrence's church was begun in 1449, and the city placed a carillon in it in 1660. In the tower of the Rotterdam Bourse is a smaller carillon of 27 bells, also more than two and a half centuries old. A third carillon in Rotterdam has just been placed in the new city hall. It is larger, both in weight and in number of bells, than any carillon made in the last 100 years.

Cities Own the Carillons.

Rotterdam's three singing towers, rising one above the city hall, one above the Bourse, and one above the church of St. Lawrence, gives one a clew to the variety of structures which may possess a carillon. And further investigation shows that similar music has floated for more than two centuries over the city gate at Enkhuizen, the Royal palace at Amsterdam, the Weigh house at Alkmaar, the Cloth hall at Ypres (destroyed during the World war), the University library at Ghent, the Wine house at Zutphen (burned in 1921), and the Abbey at Middelburg, and that the spires of not a few of the historic churches of the low countries are singing towers.

Finally, one discovers the important fact that wherever a carillon hangs, its bells are owned by the city, its carillonneur is an official chosen by city authority, and the tower itself is under city control.

At Delft the carillon is in the spire of the new church, called "new," though over four hundred years old, because it was begun a century later than the old church, nearby. Here, far above us, are to be seen nearly four octaves of bells, ranged in rows above and on both sides of the dial of the tower clock.

By making The Hague his center a traveler can easily reach every part of Holland's carillon region in day journeys. One morning the trip may be to Gouda. There, in the great church, one may see the wonderful Sixteenth century glass windows, the finest in Holland, abounding in glorious color, allegorical design, and historic interest, and listen as the carillon plays far above.

Only half an hour from The Hague is Leiden, where the singing tower crowns the low and very beautiful town hall. The Pilgrims, who, after leaving England, lived for a time at Leiden, undoubtedly heard this music, for the city has had a carillon since 1578. Twenty-five miles beyond Leiden is Haarlem. There the carillon is in the tower of the old church, famous for its organ and models of historic ships suspended high in the groined arches of the ceiling.

Amsterdam, the commercial capital of Holland, is first among present-day cities in the number of singing towers it possesses. The Royal palace, the old Mint tower, the Ryks museum, and the Zuider, the West, and the old church spires all have carillons.

St. Rombold's Is Best of All.

Most glorious of all the singing towers is that which rises above St. Rombold's noble cathedral at Malines (Mechlin). A few years ago Malines celebrated the anniversary of the 35 years of service of the distinguished carillonneur Josef Denyn—"the Paderewski of the carillon." Ancient guilds with superb banners and modern societies of every kind marched in the procession. Thousands of people filled the old streets. Houses and public buildings everywhere were gaily decorated.

This impressive pageant was but the beginning of events which filled four days, during which came the inauguration of the School of Carillon Instruction, free to all the world; the meeting of the first Carillon congress ever assembled; the opening of the Exposition of Carillon Art, lasting through September, and the playing of visiting carillonneurs from France, Holland, and Belgium.

On Sunday noon, in the crowded town hall, the burgomaster presented to Denyn a gold medal from the city, and there the American ambassador to Belgium spoke.

Malines is midway between Antwerp and Brussels and distant only half an hour from each, so that multitudes from both these cities attend its carillon concerts. Of late many have gone also from much greater distances in Europe and from all parts of the world. A program of the music to be played at each concert is published months in advance. And while the great master plays, all is quiet, even in the Grand place.

In the world today are 180 odd carillons. Of these 134 are in Belgium and the Netherlands. The rest are scattered in other parts of Europe, the United States, and Canada.

Stockings and Sovereigns

Up to the time of Henry VIII, king of England from 1509 to 1547, hose were made out of ordinary cloth, says an article in Popular Knowledge. The king's stockings were made out of taffeta, cut and seamed together. Although travelers from Spain told of wonderful hose woven out of silk, Henry never had a pair of them. His son Edward VI had one pair, and when Elizabeth came to the throne she fared better still. After trying silk hose it is said that she "never wore cloth hose but only silk stockings" until her death in 1603.

Early Advertising

In the Seventeenth century small advertisements appeared in newspapers for books, tea, coffee or medicine. A heavy stamp tax hampered the growth of newspapers and advertising in England until 1855. In America, advertisements appeared in the early colonial papers. Brief notices told of new goods just imported from England, coffee, slave sales, runaway slaves and servants, or lost cattle. Newspaper advertising on a large scale dates from the establishment of the New York Sun, in 1833, followed shortly by the New York Herald, the Philadelphia Public Ledger and the New York Tribune.

First to Protect Oysters

Rhode Island was the first state to set aside water territory for the propagation of oysters. As early as June, 1799, this state set aside a small tract for the cultivation and propagation of oysters by private parties.

Starts Gridiron Plans for 1929

AFTER two months spent on the Pacific coast, where he discussed football with many well known coaches and authorities, Coach Dick Hanley of Northwestern has returned to Evanston to map his 1929 campaign. In their Big Ten warfare next fall, the Wildcats will be called upon to meet Wisconsin, Minnesota, Illinois, Ohio State and Indiana. Notre Dame will play at Dyche stadium in the season's final, November 23.

As the first move in preparing to meet such a stiff schedule Hanley plans to open spring football training the latter part of the month. The first workouts will be held indoors and will consist of light setting-up drills. If the weather permits, the athletes will take to the Dyche practice green early next month.

Failure of several of the more promising members of the classy freshman squad to make their grades last semester has caused Purple athletic officials some regret, but with the biggest squad of first year men in history coming up in the fall, their loss will not be felt so keenly as in the past.

Coach Dick Hanley.

Coach Hanley paid a lengthy visit to Pop Warner while on the coast. He declares that Stanford's football wizard, whose system of play is being used all over the country, will flash a brand new set of grid pyrotechnics next fall.

"Let the boys go ahead and figure all they please on how to stop Pop's present system," said Hanley. "When they're all ready to break things up, they will suddenly find themselves up against something different. Pop never makes a secret of his plays. He'll tell them to anybody, but there is a good reason—by the time the others are putting the plays into use, Warner has new ones."

Sport Notes

Already we are picking out the baseball pennant winners.

• • •

Rhode Island State will have two football captains next fall. They are Dick Howes and Charles Lazareck.

• • •

Jim Perry, owner of the Indianapolis club, asked major leaguers $100,000 for his pitching star, Steve Swetonic.

• • •

A new pitcher, Clarence Kendall, of North Bessemer, Pa., a southpaw, has been signed by the Columbus Senators for 1929.

• • •

Marty Griffin, pitcher, was returned to Fort Worth by the Boston Red Sox and then sold to Mobile of the Southern association.

• • •

While the infield and outfield of the Cardinals have been much changed by winter deals, the pitching and catching staffs are about the same as last year.

• • •

One of the highest hockey scores on record was registered three years ago when the Williams freshmen defeated Springfield high school 46 to 0 in 45 minutes of play.

• • •

Pal Moore, veteran Memphis bantamweight boxer, defeated five different holders of the title during his lengthy ring career, but they were all no decision bouts, so he never gained the championship.

• • •

One of the most modern golf courses in Virginia is on the same acreage that the battle of Fredericksburg was fought in the Civil war.

• • •

The St. Louis Browns have acquired the Springfield Western association baseball club, and will operate a farm there during the 1929 season.

• • •

In Maryland the hunter has to wear the number of his hunting license on his back while in the woods. Thus, if he is mistaken for a deer or a bear cat, they get his number.

Girl athletes of Canada met and voted to continue in Olympic games competition.

• • •

Australians like cricket well enough to turn out 50,000 strong for a match at Melbourne.

• • •

The management of the track at Bowie announces the starting stalls, tried out last fall, are there to stay.

• • •

Managers of all eight clubs in the Texas league will do their mastermind work from the bench this summer.

• • •

Del D. Baker, a catcher, has been purchased for the Fort Worth baseball club from Oakland of the Pacific Coast league.

• • •

Mike Murphy, new crew coach at Wisconsin, learned the game from Ed Leader. He rowed at Washington and coached at Yale under the great mentor.

• • •

Willie Hoppe, the former "boy wonder" of billiards, never smoked or drank, but before and after each match would consume a couple of apples.

• • •

Joe Boland of Atlanta, center of the Bulldog football squad, was elected captain of the 1929 edition of the Red and Black team of the University of Georgia.

• • •

Billy Southworth, manager of the St. Louis Cards, says he learned more baseball while playing under John McGraw than at any other time in his career.

• • •

A compromise agreement to retain Enoch Bagshaw as head football coach at the University of Washington was agreed to.

• • •

Henry Schwab, groundkeeper for Cincinnati ball field, and Lenny Schwab, who performs the same duties for Brooklyn, are brothers.

• • •

Jim Faulkner, tall left-handed pitcher who did much relief duty for the New York Giants last season, has been released to the Buffalo club of the International league.

LELIVELT STARTS HIS 24TH SEASON

Skipper of Milwaukee Brewers Hopeful of Flag.

Jack Lelivelt, pilot of the Milwaukee Brewers, who has begun his twenty-fourth season in professional baseball, is rather hopeful that his charges will land a pennant this year. For the past three years Lelivelt has been leading the Cream City team and he feels confident that he now has a winning combination.

'Way back in 1906 a fleet, strong-limbed outfielder with a keen batting eye, joined the Lake Linden club of the Copper Country league in northern Michigan, and the furore that this young fellow, known as Lelivelt, raised, brought a scout from Connie Mack and the glowing phrases that this emissary sang upon his return to Philadelphia brought Jack a spring tryout with the Athletics in 1907.

It proved too big a jump and the balance of that year, and all of 1908, was spent with Reading, in the Tri-State league. Here he acquired the necessary polish and was the regular left fielder for Washington in '09, '10 and '11. He ranked with the best clubbers of the league over this three-year span.

The forepart of 1912 was spent with Rochester, and here again he flashed his war club with such effect that the Yankees purchased him and were pleasantly surprised when Big John crushed the apple for .368 in the 60 remaining games of the schedule.

In May of the following year, he was traded to Cleveland for Roger Peckinpaugh, one of the greatest of shortstoppers, and stayed with the Indians until the spring of '15, when he was sold to Kansas City in the American association.

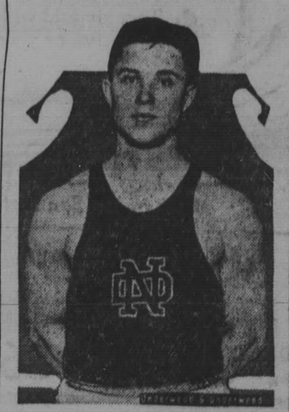
It was with the Blues that Jack started his career as a first baseman, leading the league his first season there in both fielding and hitting. After three seasons down on the Kaw, Lelivelt went to Louisville, and in '19 he was rifling the apple around as first baseman for Minneapolis.

Then came his first managerial chance—with the tail-end Omaha team in the Western league—in 1920, finishing fourth his first year out. In '21 he improved to the extent of coming in second in the flag chase, still helping his own cause with his play around first and heavy slugging.

A high salary offer from Tulsa, down in the oil country, lured Lelivelt from Omaha at the start of '22 and he rewarded his backers with a pennant. He dropped to second the next year and to third in '24.

Under Lelivelt's leadership, a chronic trailer, St. Joseph, finished fourth in '25, rounding out such an impressive five-year cycle as manager that Otto Borchert believed himself fortunate in landing him to manage the Brewers in '26.

Seeks World's Mark



Capt. Jack Elder of Notre Dame's track team is still chasing after a new world's record in the 60-yard dash. Elder equaled the mark for the ninth time in his college career in a recent dual meet between Illinois and Notre Dame.

Soccer Football Is Most Popular of All Sports

Association or, as it is known in this country, soccer football, enjoyed the greatest popularity of any branch of sport in the recent Olympic games at Amsterdam, if the financial returns constitute any criterion. A total of 249,500 spectators paid 539,000 florins to see that particular type of contest, while general athletics took second place with 130,000 spectators and a yield of 278,500 florins. The games drew a total of 663,000 paying spectators, who spent 1,425,000 florins ($570,000) on tickets, which must be a welcome echo of that vast athletic spectacle staged by Holland last summer.

Jimmy Crowley Resigns From Georgia University

Jimmy Crowley, for several years back field coach at the University of Georgia and formerly a member of Notre Dame's Four Horsemen combination, has resigned, athletic officials said. Coach Crowley said he was considering a position as head coach at another institution.

The resignation comes as no surprise, as it has been reported several times since the end of the 1928 season that Crowley would leave. Frank Thomas, University of Chattanooga coach and former Notre Dame star, has been mentioned for the place.

Minnesotan Is Best

Cadet Richard G. Hutchinson, class of 1930, of Owatonna, Minn., was named the outstanding all-around athlete at the United States Military academy in the report of Maj. P. B. Fleming, graduate manager of athletics. Hutchinson has been awarded a major "A" in football, track and basket ball. He was paired with Red Cagle at half back on last year's football eleven, is guard on the basket ball team and holds the academy record for the pole vault.

This Mother Had Problem

As a rule, milk is about the best food for children, but there are times when they are much better off without it. It should always be left off when children show by feverish, fretful or cross spells, by bad breath, coated tongue, sallow skin, indigestion, biliousness, etc., that their stomach and bowels are out of order.

In cases like this, California Fig Syrup never fails to work wonders, by the quick and gentle way it removes all the souring waste which is causing the trouble, regulates the stomach and bowels and gives these organs tone and strength so they continue to act normally of their own accord. Children love its rich, fruity flavor and it's purely vegetable and harmless, even for babies.

Millions of mothers have proved its merit and reliability in over 50 years of steadily increasing use. A Western mother, Mrs. May Snavely, Montrose, California, says: "My little girl, Edna's, tendency to constipation was a problem to me until I began giving her California Fig Syrup. It helped her right away and soon her stomach and bowels were acting perfectly. Since then I've never had to have any advice about her bowels. I have also used California Fig Syrup with my little boy, with equal success."

To be sure of getting the genuine, which physicians endorse, always ask for California Fig Syrup by the full name.

Poor Donkey!

"Yes sir," said Mr. Gallagher, "it was funny enough to make a donkey laugh. I laughed till I cried."

Large, Generous Sample Old Time Remedy Sent Free to Every Reader of This Article

More than forty years ago, good old Pastor Koenig began the manufacture of Pastor Koenig's Nervine, a remedy recommended for the relief of nervousness, epilepsy, sleeplessness and kindred ailments. The remedy was made after the formula of old German doctors. The sales soon increased, and another factory was added. Today there are Koenig factories in the old world and Pastor Koenig's Nervine is sold in every land and clime.

Try it and be convinced. It will only cost you a postal to write for the large, generous sample.

Address: Koenig Medicine Co., 1045 No. Wells St., Chicago, Illinois. Kindly mention your local paper.

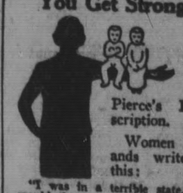
Men may suffer untold privations but women always tell them.

You Get Strong, If You



are a tired-out or "run-down" woman, by taking Doctor Pierce's Favorite Prescription.

Women by the thousands write letters like this:

"I was in a terrible state, the least thing would throw me into a nervous spell and I suffered with headaches, so severe they would almost set me crazy. I took Dr. Pierce's Favorite Prescription and it was marvelous the way it restored my nerves and relieved me of these nasty nervous headaches. To any woman who is having trouble with her nerves, I would say, take the 'Favorite Prescription'."—Mrs. H. C. Francis, 3333-40th St., Sacramento.

The use of "Favorite Prescription" has made many women happy by making them healthy. Liquid or tablets. Write Dr. Pierce's Clinic in Buffalo, N. Y., for free advice. Send 10c if you want a trial package of tablets.

RADIO SET BUILDERS. Our prices F. O. B. Seattle beat eastern catalog prices. Our merchandise is standard and complete. No 'Job lots. Fastest service. Wodel Company, Seattle, Washington, established 1888, the Pacific Coast's biggest parts jobbers of kits, sets, parts, consoles, tubes and accessories.

Wedgewood QUALITY FUEL ECONOMY SERVICE
CLOSED TOP

[For a short time only—Act Now. Lest you forget!]

Easy payments and a liberal trade in allowance on your old stove. Come in today and see us about having this newest style Wedgewood installed in your home on these unexpected terms.

Of all modern cooking devices the new improved, up-to-date WEDGEWOOD Gas Range is supreme for the following reasons:

1. Its delightful style and beauty.
2. Its matchless cleanliness—no more dirty pans. Burners remain clean. Porcelain finish as easy to clean as a china dish.
3. Its unparalleled economy. From the first *Wedgewood* made, up to the latest, most improved type of gas range it has always been a fuel saver—an economical range.
4. Its marvelous cooking speed.
5. Its wonderful automatic oven heat control gives you hours of leisure. Keeps temperature exact. No guess work. Cakes bake perfectly in any part of oven.
6. Its incomparable lasting qualities. One of the reasons why there are nearly a million satisfied *Wedgewood* users on the Pacific Coast.
